I thank you for all your hard work but if you would have listened to me when I tried to give you the answer two days after the spill happened instead of telling me you had the finest minds in the world working on the problem there would be no need for any of this im the plumber that sent the blueprint of the solution after the junk shot and funny hours later it was stopped. Next time listen even plumbers can help when the worlds in trouble

Prioritize Large-Scale Gulf Restoration Projects~Dear RESTORE Council:

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected.

- Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Sincerely,

**Correspondence: 4****Author Information**

Year after year and ongoing now is the closing of multiple beaches on the Mississippi Gulf Coast because of poor water quality. It is caused by bad stuff in the drainage outflows. A large portion comes from sewers spilling into the drainage system. This plan fails to mention sewers, sewerage, infection, or drainage. I recommend that the Plan be modified to cover this area. More importantly the situation should be fixed. It makes no sense to fix the Gulf while permitting bad stuff to flow into it.

Thank you for updating and on upcoming conferences.

How can your findings and solutions be applied also to other regions of the world and the sea which are threatened also to be contaminated?

Even rivers, wells, ground water?

I am thinking also about the Persian gulf region, the Middle East, the contaminations after long wars etc.

The contaminations of rivers like the Euphrates?

Also regions in Africa where ground water is contaminated by industry, even in the US.

Kind regards and good luck

Dear RESTORE Council:

Personally, I believe that a good first step would be to prioritize a plan that sends effluent into areas that need it instead of dredging and moving it to areas it chooses. Thus relieving the annual cost and subverting the natural process.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Mississippi River Delta and Gulf Coast. Louisiana's coast is home to more than two million people, countless wildlife and birds, and vital industries and infrastructure.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I look forward to learning more about how the Council will apply this commitment. I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the plan, I encourage you to:

- Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected.
- Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Mississippi River Delta and Gulf Coast.

Sincerely, Blaine Gilliss

Gulf Coast Ecosystem Restoration Council  
Hale Boggs Federal Building, 500 Poydras Street, Suite 1117  
New Orleans, LA 70130

Dear Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful

coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

SHOW YOUR ETHICAL AND MORAL BELIEFS BY PROTECTING THESE BEAUTIFUL, INNOCENT CREATURES. REMEMBER MOTHER NATURE KNOWS HOW TO WITHDRAW HER WONDER, WHEN WE DON'T CARE ABOUT ALL HER CREATURES AND OUR PLANET. AFTER ALL, "A STITCH IN TIME SAVES NINE."

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Sincerely,

Drs Chris and Pat Lissner, MS, PhD, M(ASCP)

Dear friend

Thanks for your email to tell me the information about gulf coast restoration.

I am very sorry , I can not go to US to take part in the interesting meetings.

I have an inventive patented technology, it's a sinking type swirling flow field for spilt oil collector used on the sea.

Different from a traditional contact type or adhesion type oil collection, the SGOT sinking type swirling flow oil collecting technology instead of dredging oil up awkwardly, indirectly and cleverly diverts oil with water and sweep the oil into the oil suction via the drag force of a huge butterfly flow field and adhesion force of oil spill. It can suck oil and quickly collect oil from an oil sheet or an oil layer of the glacial period, high-viscosity crude oil as well as some wastes on the sea surface. The oil collecting speed of our machine is several hundred times faster than others such as brush skimmer.

From this two pictures ,you can understand the different

Brush type skimmer. The length of moved oil layer that can be collected is about 2 meter

SGOT spilt oil collector of sinking type swirling flow field. A huge butterfly flow field hide in water, the fast moving oil layer circle is more than 30 meters diameter, and the 100 meters perimeter.

This technology has been successfully demonstrated at the Dalian 7.16 oil spill in 2010. I presented a speech at the ARF Seminar regarding Regional Cooperation on Offshore Oil Spill in

2014 and 2015.

I hope our technology can help you to restore gulf coast, we welcome any way cooperation .

Please contact with me,0086-13701056869,Linda Zhang

GOOD LUCK

Gulf Coast Ecosystem Restoration Council  
Hale Boggs Federal Building, 500 Poydras Street, Suite 1117  
New Orleans, LA 70130

Dear Restoration Council,

In my professional life I performed inshore hydrographic surveys for nautical charts of the coastal waters of Mississippi and Louisiana. In retirement my wife and I traveled to the coasts of Texas and Florida to pursue our interest in bird watching. I care about the future of the Gulf

Coast and want to make sure that we use this once-in-a-lifetime opportunity to restore it to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts because I believe a healthy bird population will be a clear and measurable indicator of the success of our restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Gulf Coast Ecosystem Restoration Council  
Hale Boggs Federal Building, 500 Poydras Street, Suite 1117  
New Orleans, LA 70130

Dear Restoration Council,

I am an attorney in Washington State and I am a former chairperson of the Washington State Bar Association's Animal Law Section. My comments are my own and do not represent the views of either the Bar Association or the Animal Law Section. My husband is from the Gulf Coast and we both care about the terrible events that took place as a result of the BP oil spill. No one really knows how many animals died (and continue to die) as a result of the spill. We are advocates for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and we believe that their needs are

prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

While we are pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, the plan is far too weak. Although we appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs, more needs to be done.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and we hope you will create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Sincerely,

Mrs. Cheryl Mitchell

"Birders" spend millions each year on travel, supplies, etc. just to see birds. By ensuring their continued well being, it will be very helpful to the area's economy, providing extra stimulus which the entire Gulf Coast needs while bringing their populations to stability.

Dear Restoration Council,

I care deeply about the impact of our use of fossil fuels on the environment. Of course I am a driver, and I air condition my home. But I am interested in new ways of conserving energy and lowering our commercial and human impact on the global warming that is approaching crisis proportions.

I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

As someone who spends the winter birding on the Gulf Coast I saw far fewer of these birds last winter and want to see more. I want my birding class to see more of them. Please help bring these magnificent creatures back to the Gulf Coast.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful

coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

Get accurate data on bird populations and whether numbers are increasing or decreasing. Money should be put into this effort to get a good picture on what the effect of the health of the ocean has really been.

\* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I have recently travelled to the GA seashore and was shocked at the difference in the number of shore birds, marsh birds and healthy habitat I saw there. My state has been ravaged. It needs help; long-term, large -scale help to restore crucial migratory and year round habitats and healthy flock numbers.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Dear Restoration Council,

If any ordinary vandal committed the horrendous damage in the Gulf Coast, they would be convicted, sentenced to hard labor, and all their assets attached. In the case of BP, "vandal extraordinaire," they should be put into receivership and all their assets attached for the foreseeable future. A just punishment for the damage and harm to the Gulf Coast - - caused by the corporate mindset of individual CEOs at BP, the owners, the profiteers (aka "investors") and those legislators, ad nauseum, who were indirectly responsible for permitting the "go ahead" on the Deep Horizon dangerous adventure in planet destruction.

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To strengthen the Plan, I encourage you to:

- \* Prepare / create a Climate Trust to accept ongoing damages required to remediate or repair damage to species, livelihoods of the Gulf region.

- \* This trust would require the formation of a cadre of people with specialized knowledge in repair/remediation, etc, and would come from environmental groups and their associated levels of expertise.

\* Payouts and interactions between the various associated states of the Gulf coast would be public record, and subject to audit.

\* Progress would be measured by how quickly the horrific amounts of damaging oil and oil dispersal chemicals were removed and eliminated from the affected areas.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

The world is loosing its Greatest gifts from nature.And the birds no matter its species or where

their habitats or environment they are the greatest wonders of this nation and others . Our wildlife is loosing its fight against the destruction its been done to their habitats and it is time that this ends .As destroying the Forest's green lands ,wetlands and even our backyards are been paved , For gain.Please don't let this keep happening, What are your new generations going to find to the world they will be brought to; What wonders of nature and life will they be seeing and hearing, On the supposed to be most beautiful places ; that they will never see ,enjoy and remember . It is the wrongest and most disrespectful acts against nature ,land ,ocean and air animals.

We won't see their faces of disappointment of what Leaders, who were supposed to protect ,care and make it better by conserving all those beautiful places and animals had failed them without no concern no care of what they be left with. When the most progress and stability should do what it is right.

Not an empty land , dirty ocean, no birds , Nothing for them to give thanks for and specially the leaders who their responsibility is do all their best to do their part for each issue waiting to be care for.

Please do all possible to protect what was given to all by Nature ;the most beautiful species ,lands , forests , the ocean and its creatures .

Please ,Do Strengthen the Comprehensive Plan

Dear Restoration Council,

My family and I have been to the Gulf Coast and enjoyed the wildlife that was there and we know how important it is to restore this habitat for birds, shellfish and other organisms that were severely impacted by the BP oil spill, It's important that we protect our Gulf Coast now and for the future. The draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this vital habitat for wildlife as well as humans.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

However, I hope that you will strengthen the plan in the following areas:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for updating the Comprehensive Plan for the people and wildlife of the Gulf Coast!

Dear Restoration Council,

I live on the Gulf Coast and we were nearly blown off the map from the underwater bubble the BP oil spill and the dispersants created. We DON'T EAT THE FISH BUT THE BIRDS DO!!! I care about the future of the Gulf Coast and am an advocate for the birds that were so severely impacted by it. I want to make sure their needs are prioritized in future restoration efforts

through the release of this draft Comprehensive Plan Update. WE NEED A SCIENCE-BASED RESTORATION PLAN FOR BIRDS AND HUMANS ALIKE.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Please, once the ecosystem and wildlife are destroyed or so adversely affected by mans undoing it is gone. I believe as human's, we were given a second chance when we came to the Americas. We have not done so well. When I read of what was and what is I am sick to think what we have already lost even for our generation. What will be lost to future generation's will be up to you in how you choose to work these problems out. Do we work them out so there is not more major disasters or do we wait for another one and try to remedy what man has wrought. We do not have the right to destroy the ecosystem or the wildlife that lives in said ecosystem.

Please think before making these decisions. Make them so future generations can see what beauty we have left.

I'm a part time birder and full time concerned environmentalist who is concerned about the future of our country, the world, and all it's inhabitants. I know the birds of the Gulf Coast were severely impacted by the BP oil spill. I would like to see future restoration efforts focus on ecosystem repair and bird population health and habitat.

I would like to see the RESTORE Council's draft updated plan use a science review panel that would oversee proposals and to make sure all future meetings and workshops are inclusive of all interests (especially those representing wildlife that cannot speak for themselves), and transparent to avoid suspicion of corporate influence. We need firm commitments and actions for Gulf restoration. This is good for both people and birds, and what is bad for wildlife is bad in the long run for people.

Dear Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

I am a print journalist and Vietnam War veteran. I think the Republican controlled Alabama Legislature views these funds as free money to replace money they stole from the State Legislature. Republicans have reduced business and corporate taxes until they have no revenue to operate Alabama and hence, tax the public with sales, beverage, cigarette, probate, lodging, internet taxes, etcetera to replace revenue they stole with tax breaks.

The Republicans "rounded up" the Spanish. They sent unidentified women in unmarked sedans door to door in Lillian rounding up innocent people because of their heritage and color. Do you know any Spanish they asked? Who paid for this? The public paid for it without their knowledge. NOW, they want to steal the oil spill money to replace money they stole from the public. They are too morally bankrupt to fund education, prisons, roads, parks, the elderly, the starving and mentally ill.

The Republican controlled State Legislature refuses to fund the poor who immediately give their funds back to the rich, the trickle up theory. They are poor. They spend the money for goods and services immediatly. So, why should our Gulf Coast and all the wildlife suffering from being poisoned by Big Oil greed, ineptness, lies and alibis have the money to restore o lives be stolen by criminal State Legislators literally be sent to prisons they refuse to fund.

Bobby "the Baptist Sex Machine" Bentley is building a no-tell Motel with more misappropriated funds he says he has a right to take, another delusion of adequacy from men who have no right or inkling of representing the Alabama public. They should be in a lineup. Please give the overwhelming majority of the money to a Gulf Coast Council of residents and scientists who would utilize it to protect and restore our coastal ecosystems and all the estuaries poisoned by corporate oil. The Alabama State Legislature are the last humans who should determine how these funds from corporations who poisoned us should be spent.

Thanks for your time. Have a wonderful day.

Respectfully submitted,

Robert Hyer II  
print journalist

vietnam war veteran

Dear Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful

coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

It is criminal what Mankind generally and the oil and chemical companies have done to the environment everywhere: Alberta Oil Sands, Gulf of Mexico, South America, Nigeria etc. and Manmade plastics are killing life in the Oceans. Our Planet is dying and our legacy to future generations will be a dead, radioactive and chemically poisoned Planet Earth due to man's stupidity and unbridled greed.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Restoration Council,

The Gulf Coast is so vital for many of the migrating birds that fly north along our Missouri flyway, but birds will not thrive unless the ecosystem of the Gulf is restored. Even more importantly, the Gulf should be restored for the health and economic well-being of the people who live in Coastal areas affected by the BP spill. Restoration decisions will affect this area for decades and centuries. Let's get it right by taking all the measures necessary to fully restore the Gulf wisely and scientifically.

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Gulf Coast Ecosystem Restoration Council  
Hale Boggs Federal Building, 500 Poydras Street, Suite 1117  
New Orleans, LA 70130

Dear Restoration Council,

I live on the Alabama Gulf Coast, and I care about the future of the nearby Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Alabama Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\*Acquire and protect as much natural habitat as possible!

\* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Restoration Council,

I am a long time environmentalist and a retired health professional as well as a serious birder. I have followed all of these spills in the last thirty five years and visited some of the sites. The devastation is profound and the oil companies never can or do repair the extensive damage done to the ecosystems affected. I now reside in SW Florida on the Gulf and I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

Gulf Coast Ecosystem Restoration Council

Hale Boggs Federal Building, 500 Poydras Street, Suite 1117

New Orleans, LA 70130

Dear Restoration Council,

The Gulf Coast has been rated as the number 2 most beautiful beaches in the world, and I've traveled there for 30 years. One of the best parts of the beach is the bird life, especially the black skimmers.

Please strengthen the Comprehensive Plan by doing the following:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Sincerely,

Tricia Downing

Gulf Coast Ecosystem Restoration Council  
Hale Boggs Federal Building, 500 Poydras Street, Suite 1117  
New Orleans, LA 70130

Dear Restoration Council,

Six years after the BP oil spill, life for many birds is still precarious due to damage to their habitat. BP's penalty fees are targeted to restore habitat destroyed during the spill, and we need to ensure the Comprehensive Plan contains all the protections necessary to restore this ecosystem which is vital for birds, fish, plants and humans alike.

Thank you for including critical large-scale projects and maximizing the benefits of the projects by using science-based data and review. I support the use of a science review panel and coordination of workshops and meetings to ensure cooperation and inclusivity among the many organizations involved in the restoration project.

Thank you for your continuing efforts to make the Comprehensive Plan as strong as possible.

Sincerely,  
Mrs. Paula Wehr

Dear Restoration Council,

After the BP oil spill, we saw how much damage was done to the birds, and humans, of the Gulf Coast. Now this draft Comprehensive Plan Update would allow us to restore this important ecosystem using scientific, ecosystem-scale guidelines and actions.

The RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

However, I hope you will strengthen the draft plan by doing the following:

\* Commit to the formation of a science review panel that looks across all proposals to assess

project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

I am grateful for your efforts to update the Comprehensive Plan for the benefit of the people and birds that depend on a healthy Gulf Coast.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Restoration Council,

Our natural world is under threat and of course you who live along the Gulf Coast know this better than most of us Americans. Birdlife is essential to the gulf; please do all you can to protect and nurture their well-being.

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Dear Restoration Council,

The Gulf Coast BP disaster was unprecedented in its wildlife destruction. I urge you to assure that the Comprehensive Plan Update includes the latest, science-based ecosystem restoration for birds and fish.

What is needed is transparent scientific collaboration.

Thanks for updating the Comprehensive Plan for the Gulf Coast.

We all depend on a healthy ecosystem.

Dear Restoration Council,

I have visited the Gulf Coast and know what a beautiful region it is. I want it to be economically vibrant and environmentally protected. I can't even look at the images of all the birds killed by the BP oil spill, so I want to make sure that future restoration efforts include care for birds and their habitat. I know that the draft Comprehensive Plan Update is an important step for humans and wildlife in the region.

To make this Plan even better, I encourage you to:

- \* Have a science-based review of the projects in a comprehensive fashion, so all impacts and benefits are weighed and considered.
- \* Make sure that all parties are involved in the necessary workshops and meetings, that the process is transparent, and that concrete steps and outcomes emerge.

Thank you for all the work on this plan to ensure a healthy world for the people and wildlife of the region. They deserve our care and protection.

## Correspondence: 58

Dear Restoration Council,

Our waterways need to be kept clean and protected. They are essential to our environment, wildlife (aquatic and terra firma) and I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through

improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

### **Correspondence Text**

Dear Restoration Council,

In March of this year, I visited the Gulf Coast for the first time, savoring a small sample of its bird life at several state parks, national seashores and beaches. While I missed the main spring migration, I know how very important this area is to vast numbers of migratory and nesting birds alike, and the sea life they - and we humans - depend upon.

The future of the Gulf Coast is important to me, so I want to make sure that we use the Comprehensive Plan, a once-in-a-lifetime opportunity, to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

Dear Restoration Council,

I live on the gulf coast care deeply about the future of the Gulf Coast. I want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds

and sea creatures of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I'm happy that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Restoration Council,

\*\*\*For decades, the oil companies slashed and burned their way through Gulf Coast en route to the construction of pipelines, shipping channels, and other infrastructure, while upstream mismanagement of the Mississippi River has simultaneously starved the Gulf Coast of sediment while flooding it with surplus nitrogen fertilizers. The Gulf Coast has become a dismal, tattered sacrifice zone that cannot protect the adjoining states from the hurricanes that will be more frequent in the future, and cannot provide the spawning nurseries for the oceanic species on which the local seafood harvest depends. If the Gulf is to bear any semblance of ecological health and productivity for those generations of people and creatures to come, the Council must devote its full effort and financial resources to genuine restoration, without deference to immediate development interests or accommodation of ongoing collateral damage from oil companies.\*\*\*

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Dear Restoration Council,

Thank you for a good first draft of a comprehensive plan to restore the Gulf Coast to a beautiful place for man and other flora and fauna. It is truly sad that such a plan is even needed but you have made great strides and I want to encourage you to take just a couple more steps forward to strengthen the plan for even greater positive outcomes.

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the people of the Gulf and the birds that were so severely impacted by the BP oil spill. Therefore, I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike. THANK YOU for all your hard work!

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Dear Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that

were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike. My wife and myself lived on the Gulf Coast , St. Petersburg, Fl from 2000-2005. It was the most breath taking experience of waterfowl I have ever seen. These birds are BEAUTIFUL and must be taken care of to maintain an ecosystem sustainable for generations. If not, once it's gone, it's gone forever and another species of birds are lost due to us for or neglect to respect MOTHER EARTH.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Dear Restoration Council,

I had an opportunity to visit the Gulf Coast of Alabama with my grandson 2 years after the BP oil spill. I am also an avid birdwatcher. I'm very hopeful that the restoration funds from this tragedy will be used for projects guided by sound science.

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. Experience since the disaster shows that your efforts to restore the shrimp and oyster industries have had little success. Today Louisiana announced some more oyster location closings due to inadequate growth. I would suggest that these two industries are fundamental to the statistical evaluation of your recovery efforts. Since they are failing I would reallocate all of the Recreation funding to these two areas. Recreational improvements will occur if you can provide a clean Gulf with no beach closures and a solid shrimp and oyster industry to employ the lower wage earners as well as provide healthy local food sources. In the hierarchy of needs Government-funded recreation should be far down the list.

Please see below enhancement ideas for Mississippi River Diversions

...Mid-Barataria Diversion Enhancement sketches will prevent marsh drowning, allow for many mini-diversions with nurseries, full diversion in summer months capturing summer floods and Dam Reservoir sediment bypassed, minimize flooding in Lafitte and provide healthy marshes for recreation and commercial fishing because marshes and seafood life will flourish...

Please see below link to sketches for Mid-Barataria Diversion Enhancements for review and comment. Louisiana Sportsman: Forum, General

USA Water Projects Review & My Suggestions

<http://misrivlevee.webs.com/>

Click: Sketches for Mid-Barataria Diversion Enhancements

My Louisiana Sportsman subjects:

1. Growth of a diversion resulting in a true natural process and will prevent marsh drowning.
2. Recent article shows large diversions capacity will be limited during the summer months.
3. Increased suspended sediment from Dam Reservoirs.
4. Large diversions capacity will be limited during the summer months.
5. Ideas for aerating marshes to minimize dead zones also river discharge data for 8 years.
6. Limit flooding in Lafitte by method 2 which will minimize north flow of diversion
7. Global warming and 8 years of flooding with possible future diversion decisions
8. A return to natural marshes
9. Reviewed mud pumping for wetlands with some thoughts

Great presentation and update to the plan. Could you describe how you envision coordinating with other DWH funding sources such as the NFWF GEBF? If there is a project that may be leveraged from both Bucket 2 and NFWF - how would that work, since the 2 funds have different timelines?

A 10 year plan - or "strategy" is highly visionary and a bold step for a council comprised of diverse political organizations. The Council is to be applauded for taking such an action, recognizing that implementation of restoration actions may not have recognizable and fully measurable results for many years.

Justin - in your verbal presentation you mentioned "exploring creative FINANCING" while the slide bullet uses the words "...creative FUNDING" - While these may be the same to some people, they are different. Will you clarify as the plan is developed?

Enhancing coordination across funding sources and organizations is a valuable and appropriate mechanism to accomplish both large AND small scale project objectives. Recommend the Council aggressively seek to collaborate with states for eligible projects in Pots 1 & 3 - and seek to increase project opportunities across state boundaries.

No further comments at this time - THANK YOU ALL for this webinar. Look forward to the public meetins. There will be more comments later after further review of the update and the FPL.

Good afternoon. Regarding the announcements of selections of projects and start dates of such projects, having specified dates of selection and start dates would help with proposal planning. For example, in restoring habitat, if specific plant species would require planting in fall or spring, knowing the probable start date would help the submitter coordinate tasks within projects.

Thank you for making these meetings so convenient!

Dear Restoration Council,

As Chair of the Conservation Committee of the Birmingham Audubon Society, we as a group care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. Our chapter members are strong advocates for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and we want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

We are pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, the Birmingham Audubon Society encourages you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best

results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Restoration Council,

I am deeply troubled by what is happening to our birds and wildlife and especially their ecosystem along the Gulf Coast and in essence all throughout the country. Why do we continually allow for development and the destruction of trees and land which is home to many

birds and wildlife? Can anyone answer that? Why do we continually allow for drilling and fracking in critical areas where it can affect the water and land which is home to many species of wildlife, or along their migration path? Never mind how it affects all of the people who live in these areas.

I realize much is being done or attempts are being made to address these troubling issues but it is still very alarming how much wildlife and the bird population are being affected already.

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

I am so appreciative for all the work that the Council has done and continues to do. In relation to this matter at hand, thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Restoration Council,

I am distressed that the birds of the Gulf Coast were so harmed and their numbers significantly reduced by the BP oil spill, and I want to make sure their needs are addressed in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I appreciate that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, needed for achieving ecosystem-scale restoration. I commend the Council's commitment to maximize the benefits of such projects, focusing on improved proposal submission guidelines and science-based review, as well as thoughtful coordination across agencies and restoration programs.

I urge you to also form a science review panel that reviews all proposals to assess project interactions and maximize benefits of projects selected. I hope you will ensure that the

coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Restoration Council,

As a former 30 year resident of the state of Alabama, I know how much the Gulf of Mexico means to residents there. Total restoration of the coast and water is essential to the life and economy of those who live there. I despaired to think of the results of this despicable oil spill and contamination of the the beautiful coastline and the especially the negative effect on the lives of those who live there. Do everything necessary to restore life to this area to where it was before the spill. So many lives depend on this....

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized

in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Dear Sir.

I sent an idea today and gave links to pictures of my idea in Louisiana Sportsman. Seems like the links do not work and below is the comment where the links would work. My comment ID is:1078709-74561/55 Also attached are the sketches.

Regards

Jude Ramagosa

Dear Restoration Council,

The destruction that the BP oil spill incurred on the Gulf Coast is too devastating for words. The

decimation of such a large percentage of the area's birds and wildlife has dramatically altered the ecology of the region.

I urge you to make the most of this comprehensive plan in order to restore some semblance of habitat to the coast, so that in the future birds and wildlife may again thrive.

Thank you for making this happen. I place my trust in your hands.

RESTORE Council

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

I cannot believe that the government still is issuing new permits to drill in the Gulf and permitting existing deep water wells to remain in operation. Given this horrible policy, strong precautions are essential to protect the ocean life, shore wildlife, beaches, and habitats along the Gulf Coast.

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. RESTORE Council

Dear Council,

I have lived in panhandle Florida for 14 years, and I have come to love this place. I am continually delighted about the profusion of wildlife here! I'm originally from Utah, and I see more wildlife in Florida than I did there!

I care about the the Gulf Coast, and it pains me to see that wildlife here is struggling. I am pleased that the RESTORE Council's draft updated Comprehensive Plan is a commitment to advancing large-scale projects, critical for ecosystem-scale restoration. May I also praise the Council's intention to maximize the benefits of projects through improved proposal submission guidelines, more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete steps for improving efficiency and coordination in Gulf restoration efforts.

I appreciate your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, improved proposal submission guidelines, more robust science-based review, and a more thoughtful coordination across agencies and restoration programs.

We must increase our Gulf Coast restoration and resiliency along the Gulf's full coastline (including Florida and Texas) in the face of the increasing 1) climate change and 2) fossil fuel driven devastation and destruction we can expect to keep coming our way.

We lack both the political will and regulatory capacity to reign in a fossil fuel industry that continues avoid responsible practices that would help protect its own infrastructure and operations from the catastrophic climate change it's continuing to push our way. So we must plan and work around an industry that remains largely immune to both government and self restraint and regulation.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration

efforts.

\*Environmental issues; remediation before litigation. You mess it up, clean it up now.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

The Gulf Coast is a great treasure of our country and the world, and I'm glad that the RESTORE Council's draft updated Comprehensive Plan includes the kind of large-scale projects needed. ,

I'm happy to see in there the idea of making the most out of the potentials of projects through improved proposal submission guidelines and better scientific reviews, and coordination.

I also urge the following: :

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected to achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for pressing forward on restoring our great Gulf Coast..

RESTORE Council

Dear Council,

Our Gulf is a national treasure and is being eroded and degraded every day. PLEASE protect it. Otherwise future generations will have NO REASON to visit and it's tragic destruction- - because of unwillingness to be responsible stewards- -will be disgraceful, immoral and unforgivable.

To strengthen the Plan, I encourage you to:

- \* Form a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan to save the Gulf Coast.

RESTORE Council

Dear Council,

destiny is real, read and see:

jesus referred to the ultimate as "our father" for two reasons: the first was to suggest a supremacy of origin, which is quite obviously true, as you most definitely did not develop our father, but were developed into by him, and the second was to suggest the mutuality of our love which should be apparent, as this life was viewed by him as a tremendous gift. the way in which we should show our mutual love to our father is through showing respect to all life as that is what he is. whoever is so blind as to suggest some sort of disrespect in assuming yourself to be the ultimate quite obviously can not understand our unity + consequent eternity. the way to show love to our father is quite obviously by not showing disrespect to any of his reflections, which are everything, by placing them in factory farms, or even making it so that they feed on each other. understand the objectivity of reality is manifest in the fact that humans are merely objects, true, highly intricate objects with the capacity for pleasure, eternal as our father, and so our destiny is to achieve the ultimate pleasure + thereby enter an eternal paradise.

message from national wildlife federation follows:

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. As the Corporate CEO'S OBAMA noted, "were all stupid." That being acknowledged then Why Are Corporations running 1) for "office"? and 2) when will Asset Recovery begin? Political Office and Corporate Votes are Restricted to those within the Corporate Payroll, the US Citizens do not fit within those Legal Definitions yet we have Attorneys who are ignorant of Laws running as the CEO/PRESIDENT of a Corporation known as The US Government Inc. Overruling the People's Rights and Constitutional Protections and Guarantees. The List is Lengthy of Illegal Acts, Deceptions, Cabal Mandates, Contrived Wars (George Bush is 9/11), Takings of the People's Sovereignty, Land, and Chemical Apartheid via Chemtrails, Petroleum, Fracking, and Forced Inoculations only to be followed by mass Deaths. Stay in the Twilight Zone of Deception much longer and there Scorched Earth Policy will Self-Complete.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

Since there was a substantial mortality rate among turtles should not there be a recommendation from your group that states to other departments of the U.S. Government that turtle excluder devices should be used more widely and there should enhanced enforcement of this rule? It appears to be something that would benefit gulf restoration.

Thank you for reading my comments.

RESTORE Council  
Dear Council,

As both a citizen who cares tremendously for the environment, and as a Professional Biologist who walks my talk concerning preservation of our rapidly-disappearing natural resources (in every arena), I care IMMENSELY about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime - re-read that - - ONCE IN A LIFETIME!!!!!!!!!!!!!!!!!!!!!! - - opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

All that said, the Plan needs further strengthening, which we count on you for!!!! To further strengthen the Plan, I'm asking / PLEADING you to:

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

I can't thank you enough for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast - - and even more so, our planet and all of its inhabitants DEPEND UPON YOU and THANK you. This is a critical moment in the ability of the Gulf to ever recover... which will affect all of humanity.

Dear Attention: Draft Comprehensive Plan,

I ask that you read this message by people who are the experts in this field. Thank you.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.

2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

As a personal recommendation, I think we should have a group of recognized and acknowledged experts in the wildlife and plant life in the area monitor rehabilitation efforts and collect actual data on endangered species and (for instance) acreage that is still damaged or has been remediated.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Attention: Draft Comprehensive Plan,

Thank you for all the work you have already done to re-enliven the gulf, an ecosystem that so much depends on. There is so much stress on our oceans already and your work is of utmost

importance. The release of the draft Comprehensive Plan Update represents an good step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Attention: Draft Comprehensive Plan,

The Gulf of Mexico is a great natural resource that provides bountiful food and coastal protection and enrichment. The draft Comprehensive Plan Update represents an important step

toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment. A viable ecosystem that provides protection for forage fish that sustain a viable fishery and diverse sea mammal population must be protected with scientific management that restores the terrible damages that the Gulf ecosystem is receiving.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am very pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both

through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

The problem, increasing at every level of our society, of secrecy- -especially on the part of the government, which is simultaneously spying on us at levels unimagined before except in science-fiction parables- -has got to be solved if we're to continue living in a functional democracy. And woe to us and the environment we depend on without that! There is only one to solve the problem and that is to start being transparent, now. The proposed review panel is part of the attempt to halt the rot of secrecy: some people will be able to consider projects and their progress in relation to each other, fiefdoms and their self-defending secrets cannot develop. As Justice Brandeis said, long ago: sunshine is the best disinfectant.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

\*\*\*For decades, the oil companies slashed and burned their way through Gulf Coast en route to the construction of pipelines, shipping channels, and other infrastructure, while upstream mismanagement of the Mississippi River has simultaneously starved the Gulf Coast of sediment while flooding it with surplus nitrogen fertilizers. The Gulf Coast has become a dismal, tattered sacrifice zone that cannot protect the adjoining states from the hurricanes that will be more frequent in the future, and cannot provide the spawning nurseries for the oceanic species on which the local seafood harvest depends. If the Gulf is to bear any semblance of ecological health and productivity for those generations of people and creatures to come, the Council must devote its full effort and financial resources to genuine restoration, without deference to immediate development interests or accommodation of ongoing collateral damage from oil companies.\*\*\*

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to

maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Council,

I write to you because I am concerned about the health and recovery of the Gulf Coast. I worry about the ongoing effects of the oil spill and other human actions that have imperiled the life of the Gulf. I am concerned about the future of the Gulf Coast, and write to ask that you be sure to do all that you can to restore and help sustain this unique ecosystem's health.

I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Attention: Draft Comprehensive Plan,

Thanks for the progress shown in the draft Comprehensive Plan Update for the science-based restoration of the Gulf Coast. With such a large project, perhaps the plan can be improved by the formation of a comprehensive review panel that can facilitate coordination of the activities.

The Gulf Coast is a national treasure that deserves our best protection.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.

2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Planet Earth needs our stewardship. Thank you for taking the lead.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Attention: Draft Comprehensive Plan,

For six years since the Deep Water Horizon disaster, the Gulf of Mexico and its rich ecosystem has sat damaged and abandoned. The salt marshes there were home to many important, rare, and endangered species, such as blue crabs, whooping cranes, and diamond back terrapin turtles. The mangroves provided flood surge buffering and help maintain water quality by removing pollutants carried to the Gulf from rivers and land runoff, and are home to many protected bird species such as egrets, herons, and the roseate spoonbill. The oyster reefs provide important ecological and economic benefits to humans and to coastal ecosystems, including removing pollutants, nutrients, and sediments from the water, and providing habitat for numerous animals including barnacles, shrimp, crabs, and fish. We need all this back. I am writing to ask you to make the Gulf restoration plan as comprehensive and strong as possible.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result

in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Please, don't just pretty-up the shore. Vital wetlands, beaches, and habitat must be restored. Show us the progress! The Gulf itself is still sick. Turtles and dolphins are still dying. Do something real and show us all how that happens. Do yourself proud for the Gulf.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a

lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

In the final draft, please rely on science to restore the Gulf.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast and I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration.

The devil, of course, is in the details and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both

through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. Hopefully this will proceed without further delay.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. It is a positive step towards restoring The Gulf in which the RESTORE Council's draft's updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. It is with anticipation we look forward to learning more about how the Council will carry out this commitment.

We admire the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, you are encouraged to:

1. Commit to the formation of a review panel which looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure the coordination workshops and meetings in 2016/2017 are transparent and result in concrete steps for improving efficiencies and coordination in Gulf restoration efforts.

America needs The Gulf to be a thriving ocean environment producing healthy fish, plants and salt water creatures. This is a "must" for the future, and needs to be swiftly enacted.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast, all species and America's future.

Dear Attention: Draft Comprehensive Plan,

I have fished and sailed in the Gulf for a number of years and would like to see that future generations be able to experience the beauty and diversity that I was able to do. I remember seeing a scale from a Tarpon that our President FDR had caught in the Gulf and signed. Hopefully your work might be the catalyst to restore the Gulf to historic environmental levels. Many populations of migratory waterfowl, shorebirds, and songbirds depend on the Gulf and we would be a much poorer Nation without them.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

Dear Attention: Draft Comprehensive Plan,

I have never forgotten the horrendous disaster of Deepwater Horizon. The disturbing nightmare of destruction to this part of our planet, and the unknowable long-term effects of it may possibly be irreversible. However, there is no choice but to do everything that can be done to heal this wound.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result

in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

3. We know the oil is still in the sand, shoreline, and marshes, plus places not seen, plus 10 million gallons is still on the seafloor affecting organisms in the deep water ocean. It's necessary to learn if the oil will move around and how it will impact subsea vegetation, turtles, dolphins, fish, and even birds.

4. Six hundred square miles of water were affected in the Gulf of Mexico in 2010, the worst oil spill in U.S. history. Ergo, the Council must ensure the well is still closed and sealed and hydrocarbons are not emitted. Emission will have a negative affect on the worst issue of the day, CLIMATE CHANGE.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

Although I now live in Nevada, the Gulf Coast is a special place that I enjoy visiting. The area deserves strong efforts at restoration.

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council  
Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

It's TIME that BIG OIL COMPANY'S take RESPONSIBILITY for their actions against the GULF COAST and it's WILDLIFE and PROTECTIONS!

RESTORE Council

Dear Council,

I care deeply about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its absolute fullest potential. I am very pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are surely critical for achieving ecosystem-scale restoration!! I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs. Science and true facts MUST prevail and guide this restoration process, Please follow scientific facts!

To further strengthen the Plan, I encourage you to:

\* Commit to the suggested formation of a science review panel that looks across ALL proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the

best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

These are important and necessary steps that need to be taken!!!

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast!!

Dear Council,

I care about the future of the Gulf Coast of Mexico, and as a Minnesota resident, I feel guilty that pollutants to the Mississippi River from my state are contributing to the dead zone in the Gulf.

I am delighted that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

THESE SUGGESTIONS ALIGN WITH AREAWIDE ENVIRONMENTAL IMPACT STUDIES ALREADY REQUIRED FOR PERMITTING INNUMERABLE PROJECTS FROM EXTRACTIVE INDUSTRIES TO DEVELOPMENT PROJECTS. IT ALSO COALESCES

WITH A NOTION ONCE HELD HIGH IN GOVERNMENT DECISION-MAKING:  
PRINCIPLES OF ONE AGENCY MAY NOT NEGATIVELY IMPACT THE PRINCIPLES  
OF ANOTHER AGENCY. THESE CONCEPTS ENSURE BEST USE OF TAXPAYER  
DOLLARS AS WELL AS ACHIEVE THE GREATEST GOOD FOR PROTECTING ALL  
LIFE FORMS DEPENDENT UPON THE WATERS OF THE GULF OF MEXICO.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the  
Gulf Coast.

Dear Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-

lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

This should not continue to be an issue, responsibility and accountability has been ignored long enough!

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Restoration Council,

From the first time I saw the Gulf Coast, I knew that it was a special place for people and wildlife. I learned to respect it more when I learned of its importance to migrating birds. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through

improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Embrace a truly scientific point of view, not one weakened by pseudoscience.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

It is time to protect and preserve that which is left of our wildlife. We can no longer afford to kill randomly, pollute regularly, damage forever, the environment which sustains life- of all living things.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive,

and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

\*\*\*\*\*

Gulf wildlife are important elements in the national ecosystem. Do not listen to the selfish and greedy, but respect the investigative work scientists have been doing for years to protect our environment. I'm sure they want the fruits of their labors to benefit life on earth. Their wise advice can help in caring for all projects that deal with the preservation/conservation of our environment.

I am happy to see water quality and the estuary approach. This approach lays the framework for large scale projects to put together funding streams in a meaningful way. The collaboration meetings are a great addition. Upstream and downstream collaboration is more of stakeholder engagement. Upstream is coordination between agencies and project development activities. We

would like to have more stakeholder engagement with the upstream. We are happy to see leveraging. We are creating financing to jazz up the yearly payouts. Creative financing should involve private financing, which would create more willingness from the political leaders. We are excited about that and appreciate the great draft you all have come up with.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.

2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

As a project manager, I know that the success of any project, but especially one the size of this effort, depends on effective communication. Indeed, communication is the most critical element for success.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Thank you for having the meeting here. The transparency aspect is important. Thank you for providing more updates so that the public doesn't forget your plan. Thank you for adding expert reviewers to have an additional panel for project interaction. Yes, to water quantity and yes to the watershed approach. Water quality is essential and will affect oyster restoration. Common water quality monitoring protocols, data archive access and sharing data are very important. It is

also important to coordinator an overview of the watershed. I like the Gulf of Mexico estuary program. The bonding option is an important thing that we are talking to congress about, based on BP's needs not gulf restoration. We need to consider the benefit sooner rather than later.

I like the way you put it into perspective. The settlement is still the largest ecosystem restoration on the planet. It is important to keep that in mind. I commend the council and staff, and am pleased for the revision. I like the updates to the submission guidelines, best projects moving forward, linking, renewed commitments to prioritization to large scale projects. I like layering funding from multiple sources in focus areas, which will have a lasting benefit. Continue to

engage the public in more stages of the process. Opportunities for public input were a little bit late in the early process. On the webinar and on the Florida TIG webinar, we heard both speakers talk about coordination among the different funding streams. We encourage you to continue to do that. Water quantity, watershed approach when different science reviewers aspects of the plan we support.

Dear Attention: Draft Comprehensive Plan,

As a Parent, Journalist, Teacher and Community Leader as President of the Olympia Fraternal Organization of Eagles with over 450 members, I have been working on environmental issues for over 40 years. I remember back when our rivers were burning, Great Lakes dead and I am dead tired of corporate bullying in the name of profits for those who deserve none for poisoning our seas, air, food and lands. It is disturbingly hypocritical of our Department of Interior, industry representatives and politicians to have access to 40 years of foundational peer-reviewed documented evidence of harm and danger with our energy sources particularly oil, gas and coal yet to essentially give industry a complete pass on the true economic, environmental and health costs of these reckless methods of energy production. These industries must be held fully accountable for their devastating impact and make room for true progress with new standards and low impact energy sources. Our government agencies must follow their critical mandates and take the strongest actions possible to protect our planet, children and all future generations.

As a multi-continent deep sea diver and world traveler, I have personally been infuriated while

watching as a slow train wreck continues in our environment, land air and water, where the use of fossil fuels has overwhelmed the incredible animal, plant, fragile environment and native peoples interests with flat out greed. The Exxon Valdez cleanup is incomplete, funds locked in lawsuits and all efforts have been inadequate and ineffective. The Deepwater Horizon has devastated that area and will for decades. The oil train fires and spills are legion and an unacceptable risk to the incredible wealth of our nation's treasured fisheries, landforms and water. Our government and corporations are a complete failure in showing responsibility with much more damage, oil spills and garbage strewn across many fragile landscapes with reckless abandon.

OUR nation's lands are valuable beyond measure, fragile beyond belief and threatened with a generations-long catastrophe for a product that should have been phased out long ago and threatens our survival ironically illustrated by the diminishing arctic ice and desertification of wide swathes of our planet including California. I am appalled as are a clear majority of Americans who seem to be regularly ignored by our representatives and weak-kneed governmental regulators, a failure on many grounds.

Everyone I know with any knowledge of this supports stronger safeguards and wants the DOI, BLM and all government agencies to take strong public policy actions that will ensure the long term safety of our communities and address the risks to our families now and in the future. Below is the LEAST you MUST do.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project

interactions and maximize benefits of projects.

2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Please inform my representative and me about the depth you will actually go to protect us. Our future generations and our own health depend on the actions you actually take.

2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. This is happening way too often and it is dangerous. None of this feels safe. This is not how things are supposed to happen but it does. There is never a guarantee that this will never happen. It is like the damage is already done. People lose

their lives and things are destroyed. There are so many spills and those spills cost lives. This is not a game anymore. This is dangerous and unsafe. This is no joke.

This is very real. This is reality. How much more real does this need to get? How many animals have to lose their lives? The water is unsafe and unhealthy. This has been a huge issue for sometime now. This is getting a little old now. This is very serious. Animals' lives are at stake. The water is at stake. People's lives are at stake. This is nonsense. How many animals have to suffer? Some animals are on the endangered list and those animals could lose their lives all because of someone else's stupidity. Is this what you people really want to happen? This is

never safe. This should have never been allowed but yet it has. There is no safety here. To much oil spills into the water and wild life die and that is a much bigger issue that will not go away anytime soon. Enough is enough now. Things need to change now. You people are not taking this seriously enough. You people need to do your jobs. We can't lose anymore wild life. We need to save the wild life and the water. Where is the justice here? There is no justice. This has gone on long enough now. This is not being handled to well. Justice needs to be served. There needs to be more protection for wild life and the water ways. No more spills. People need to be more responsible for their actions. People are not responsible enough for their actions. Don't let this keep happening over and over again.

We support your update. We would like to encourage you to consider other tools to implement this plan. Specifically, projects that directly protect wildlife habitat. Use these resources to protect these habitats along the gulf coast. Important adjacent to other wildlife refuges, such as Tindal Airforce Base. Land acquisition dollars can protect areas that are already on the market and can potentially be lost. Existing conservation values, put that tool back in your toolbox. Florida Forever local programs, pot 1 funds, military base buffering funds. Partnering with land managers can help you ensure that these programs have success. Sea lever rise is causing our

estuaries to slowly disappear. We need to buy land uphill. Your wildlife need a place to live. Consider long-term future resiliency, focus on land conservation efforts.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

I FLEW OVER THE GULF ON MY RETURN FROM GUATEMALA IN MARCH. I COULD CLEARLY SEE THE VAST STRETCH OF OIL PUMPING PLATFORMS. RESTORATION NEEDS TO BE DONE WITH A CLEAR UNDERSTANDING THAT ANY FUTURE SPILL OF EVEN A FRACTION THE MAGNITUDE OF THE BP SPILL CAN NOT BE ALLOWED.

STRICTER CONTROLS ON CURRENT DRILLING AND PUMPING PRACTICES NEED TO BE ENACTED TO PREVENT SPILLS THAT COULD EASILY TAKE PLACE DURING RESTORATION FROM THE IMMENSE IMPACT OF THE BP DISASTER. AS A MASTERS LEVEL ANALYTICAL CHEMIST, MY VIEW IS THAT CERTAIN DAMAGE TO THE GULF IS NOT POSSIBLE TO RECOVER FROM IN WELL OVER 100 YEARS.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Council,

Please do what you can to protect the sea turtle which is having trouble making a comeback in the Gulf after that horrific oil spill. Please read on:

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

A lot of people say it's a done deal and I say no, they are actually taking a pause to reevaluate where you're at to go forward. Thank you for doing that on behalf of Santa Rosa County. Transparency, voted to spend all of the bucket 3 funds on the Pensacola bay watershed. Santa Rosa Sound, water quality, want to focus the money, leveraging, would like to collaborate and get two to one or three to one, so they can tell the tax payers, look what we've done. You've sold our county in on the collaboration, science based. We need to have cooperation with UWF and UF. With water quality monitoring, you get what you pay for. Tell the public the benefits of how you reached your goals, estuary program. I've never seen where all the counties were working together to improve water quality in Northwest Florida, this is an opportunity for each watershed. We are competing with each other to have an overall plan, an estuary program, to find that so we can all work together. Thank you, we are committed to collaboration with the council.

Dear Attention: Draft Comprehensive Plan,

Obviously I am relying on the staff of EDF to compose the bulk of this letter but I trust the work that EDF does and I strongly believe in its mission. It is imperative that all reasonable steps be taken to restore the health and well-being of the Gulf Coast to address the impact of the Deep Horizon disaster.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Thank you for your dedication to do this right. EPA and Florida for the estuary program. I grew up here, I would have never believed that the panhandle would be as motivated. It's a huge deal to invest the funds on the right things, to make the legacy that we want to have. I hope that you would create another one, if not three. Chamber of commerce has signed resolutions, local governments, NGOs. It will get everyone on the same vision. Thanks to Kelly for updating the swim plans getting the funding, completing the modification for these plans, building on each other to do the right things in the right places. Thanks for investing in that effort. Single most important decision that you've made.

Thank you, positive collaboration with funding sources, great example is Pensacola Bay. Bayou Chico is one of the most impaired water bodies in the Gulf of Mexico. Allocated \$6M in Beach Haven. Northwest Florida has also allocated about the same amount, those two funding sources working together reach \$12M in project funding. This is a huge improve to water quality, leveraging of funds, Grover Robinson has directed staff to have a three to one leveraging goal for our direct component funds. Pot 1 \$70M in funding for the next 15 years. To turn that into over \$200M. If that can be done with all of the pots of money that would be tremendous. We can do a lot of good with that. I want to reiterate the estuary program. It's a shame that there is competition in Northwest Florida. There are so many good organizations. Find more funding to stand up two or three estuary programs.

Dear Attention: Draft Comprehensive Plan,

Frankly, I am sick and tired of those who are not just science-deniers, but also BLIND TO REALITY. These are people who deny that no one can live on islands like Fiji, because the oceans have risen so much. As I say, blind to REALITY, NOT MYTH. They also seem to think Louisiana wasn't just inundated with a storm that shouldn't have happened for some number of hundreds of years, according to statistics across millennia- -but then, they deny statistics; after all, they're just FACTS that show what has ACTUALLY HAPPENED FOR ALL THOSE MILLENNIA!

You know, the earth will be fine after it gets rid of the human race. It will take quite a long time to recover from the horrid things we've done to it, but it will recover. What will NOT recover is the human race and all the other living creatures who happen to be stuck on this planet with these egregiously self-centered, greedy, moronic, ignorant, and actually hateful others who just refuse to look at facts and data and, again, REALITY!

And they seem not to give a tinker's damn how many of us, of their children, and of their

children's children will die SLOWLY AND HORRIBLY from lack of clean air, clean water, from water wars, from starvation, and on and on. They make me sick!

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. As a Canadian, I viewed with horror the devastating oil disaster in the Gulf six years ago and now I am pleased to find out that the RESTORE Council's has a draft plan that expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project

interactions and maximize benefits of projects.

2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

I am British, but care about the future of the Gulf Coast, and want to make sure that you use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects,

which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, please:

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Having the gulf compromised has hurt our people there, the land, sea, and the creatures that lived there. The ocean floor is covered with oil and dispersent. There is still leaks and the people living there can not do the fishing that supported their families. This mess was caused by greed. We need to show that greed does not win.

## Correspondence Text

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. Please follow through with this restoration project.

Dear Restoration Council,

IT IS NOT ENOUGH TO CLEAN UP THE BIGGEST BLOBS OF OIL. YOU MUST RESTORE DAMAGED WETLANDS, SEA FLOORS, AND BEACHES. AND YOU MUST SUPPORT DEPLETED WILDLIFE POPULATIONS. THE GULF MAY NOT BE RIGHT FOR DECADES, AND YOUR RESPONSIBILITY DOES NOT END UNTIL IT IS.

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Attention: Draft Comprehensive Plan,

Planet earth should always come first, because when people put their lives first before anything else, life itself begins to destabilize and slip away.

I'm going to be very blunt here, and I am not saying this to be mean. People out there need to stop having multiple child families, and here is why. The reason why we develop these resources is because people out there need them for survival. The fewer people there are here on planet earth, the less impact we will have on the stability of life. Our lives are not the most important area of life to nurture and protect. We depend on the "life" around us to support our own lives. When we get greedy and only think about our desires and ways of life, we are only hurting ourselves in the long run, and the processes of life here on planet earth were designed to last almost indefinitely. Our sun is only at its midlife point, but our planet, is showing signs of advanced aging, due to our pollution, modernism and reckless ways of life. Along with reducing pollution, we also need to reduce ourselves, back to respectful and responsible numbers for the benefit of nature and the continuation of life. The time to better ourselves is now. Our time here on this planet will grow shorter the longer we turn our backs on it. I'm not sure what the world leaders think they are doing out there, except that there doesn't seem to be much seriousness going on regarding the misdeeds of mankind's negligence towards nature and all areas of life. The solutions to life's problems are not really that difficult. The biggest problem we have, are

people's hearts sinking in their chests when they think about having to cut back and slow down their lives a bit. We are human beings for goodness sake, we are just as intelligent as we are desirous, and while we all enjoy having fulfilled lives, we also need to "use our brains" a bit more, and find creative ways to balance what we want with what is right, and to look beyond the negatives that we see in some things, and search for solutions instead.

Does it really defy common sense to stop adding water to a large plastic bag before the bottom splits open, and causes everyone and everything on planet earth to perish? How close to catastrophe do we have to go before we open our eyes, drop our jaws and say, okay, we need to back off.

Perhaps there are malevolent individuals out there trying to push life here on planet earth over the edge intentionally, or the world leaders simply don't know how to address our problems without causing a riot.

I am just a single individual standing against 7 billion other people, many of which have been poisoned by arrogance and pride, whether people are religious or non religious, there is not much "wholesome" thinking taking place out there. Our focus needs to be on the wellness and future of life here on planet earth. We all seem to get a bit offended when someone steps on our toes and beliefs, but there is no good reason for people to not be on the same page regarding the condition and well-being of life here on planet earth.

Some of the choices and changes we face are not always going to be in favor of our beliefs, but there is one thing we can all agree upon, and that is to support the continuation of life for many, many generations to come, and sometimes that means swallowing some of our pride and egos, and working towards a greater good and purpose.

It doesn't take a great person to change the world, because the world can't change from the actions of a single individual. It takes everyday heroes, and average people to climb to new heights of awareness and responsibility, even when such a climb feels not only daunting, but humiliating as well, and it isn't until we humble ourselves a bit that we truly understand what leadership and honor really means.

Dear Restoration Council,

I live on the Gulf Coast of Florida and am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill. It is vital that their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the formation of a science review panel that evaluates all proposals to assess project interactions and maximize benefits of projects selected, so as to achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete actions to improve efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan. The people and birds that depend on a healthy Gulf Coast environment deserve nothing less.

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential.

So many of our waters have already been ruined by development, drilling, pollution, and humans.

Enough is enough!

Our waters are supposed to be a place of peace and quiet for us, and the fish and wildlife which live in them!

The animals are running out of places to live and be safe. Our fish and wildlife are under threat from so many angles. They desperately need to be protected, mainly from humans.

Life is hard enough for people, let alone the animals.

Can't we please offer them some much needed help?!

PLEASE save the GULF OF MEXICO for all future generations before it is too late. Some damage cannot be undone!

I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Attention: Draft Comprehensive Plan,

Re: The draft Comprehensive Plan Update.

I am most in favor of plans to restore natural wetlands in coastal areas. Wetlands act as nature's sponge, soaking up water and also cleansing runoff from pollutants.

The proposed plan represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. This has the potential to also act as a model for plans to restore areas impacted by future energy-related catastrophes.

I am happy to learn that the RESTORE Council's draft updated plan shows a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- 1) Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
- 2) Ensure that the coordination workshops and meetings in 2016-2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

## Correspondence Text

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects through improved proposal submission guidelines, more robust science-based review, and thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across proposals to assess project interactions and maximize the benefits of selected projects to obtain the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving Gulf restoration efforts.

Thank you for your efforts to create a strong legacy for the Gulf Coast.

## Correspondence: 238

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.

2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

I have a friend I visit in Florida who is quite near the gulf and she took me there recently. Everything looked fine, but a few shovels down the white sand became an oily smudge. WE NEED TRANSPARENCY! Please!

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

This, numerous other issues (climate change, food labeling, gun regulation, immigration reform, prison reform, education reform, short-term lending regulation, healthcare reform, banking regulation, TPP) remains a vexing problem primarily due to corporations' ability to curry favor with elected officials. The corrupting influence of money in our political system is undermining our democratic traditions and discouraging Americans from voting and/or running for office. This ominous development may well end our experiment in representative democracy unless we alter this decades-long trend. For the sake of the republic, we must amend the US Constitution to state that corporations are not people (and do not have constitutional rights) and money is not speech (and thus can be regulated by state and/or federal campaign finance laws). Short of accomplishing this, no other reform of significance will be achieved. The moneyed interests will turn any reform to their benefit, often at the expense of the nation as a whole.

Hello, my name is Alan Solomon and I live in Southern California. I agree with the above statement and support it in every way possible. We all need to recognize what the Gulf Coast has gone through in the past, especially the people, Wildlife, animals and the environment in the whole area. As they have said above, please commit to the formation of a review panel that reviews all proposals. Get it in force today, please. Thank you for your time today. Alan Solomon

Dear Attention: Draft Comprehensive Plan,

Your spill devastated the tentative Gulf Coast recovery from the housing market collapse. My son and his friends graduated in 2008 entering and those young men and women lost the ability to earn an income from devastation of St Pete Beach which just as they were starting the college

student/productive members of society, it was ripped away even though not one drop of your blasted oil reached the shore in our area. Seafood in Florida came to a standstill.

Some of this group of young men and women (the one w/o rich parents, ie, my family and many around us) have struggled. Spice, K2, heroin, selling said illicit drug trade, exotic dancing as well other demeaning things young women should not even have to considering to earn a buck, progressing into unwanted pregnancies, STDs.....

Shall I continue? I sincerely believe BP ivory tower jackasses have no idea of the ripple effect inflicted upon all levels of the entire Gulf Coast communities.

Call me 727-517-6434 or email @bonnie.markley44@gmail.com. I'd love to provide any further information that I'm able.

The Gulf Coast should be OFF LIMITS FOR ANY DRILLING EVER!!

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

Dear Attention: Draft Comprehensive Plan,

The Deepwater Horizon oil disaster in the Gulf of Mexico destroyed the environment and livelihoods of communities in that area six years ago, and this should have been fixed and restored immediately rather than forcing them to continue to suffer the poisoning and the injustice of it.

The release of this draft Comprehensive Plan Update represents an important step toward

meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

Dear Attention: Draft Comprehensive Plan,

I want you to go along with the Gulf Restoration Plan. The oil crisis in the Gulf of Mexico has caused lots of destruction. Though some of it undoable, some of it isn't And there could damage that can be stopped now by cleaning up the oil spill. Remember the longer you wait, the more damage the oil spill will do. But BP should be the ones cleaning up the mess. It's like if you make a mess, even if it was an accident, you have to clean it up. And BP didn't even exactly do it by accident. What I mean is, though they do what they did to cause the oil spill, they knew the risk, and just didn't care.

Dear Attention: Draft Comprehensive Plan,

I believe your work is very important for the health of the Gulf and all the people impacted by this disaster. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to

learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

RESTORE Council

Dear Council,

WHAT IS THE MORAL CODE YOU NEED TO DECIDE HOW STRONG THIS PROTECTION NEED BE FOR THE OTHER LIFE ON THIS EARTH. WE MUST BEGIN TO REGARD THE EARTH ALIVE. WE HUMANS HAVE ETHICAL AGENCY. IT'S ALMOST TOO LATE. I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

We are so glad the Council is looking to lead coordination among different restoration pots. Seeing the things we have been able to accomplish with Bayou Chico by utilizing & coordinating these funds has really been able to make an impact. Looking forward, we would like to see the Pensacola Bay Living Shoreline be a future example of this. Also, please continue in the future FPL's to consider doing some work in Perdido Bay. This bay has suffered from being along the state line and needs a unifying agency to help lead restoration efforts.

- collaboration with other funding sources is very important

- Bayou Chico is a good example

- large scale projects have more of an environmental benefit

- fewer large projects better than numerous smaller disconnected projects
- leverage funds
- even a goal of 2:1 leverage would double the \$16B to \$32B, or 3:1 goal would be \$48B
- delay in funding - 9 months since early December and FPL list
- bonding or more funding up front - difficult to do larger projects

I would like to see the purchase of a huge piece of property on the Western Shore of Mobile Bay which is owned by the University of South Alabama Foundation. The park-like property was formerly a Golf Course and is located between the Airbus Manufacturing Complex and Mobile Bay. This huge parcel of land is undeveloped and could be purchased through your funds and held in perpetuity for conservation. This would allow public access to the bay via the development of a park and would be a showcase area for Mobile Bay Restoration.

Please consider the purchase of this huge parcel which is one of the few undeveloped parcels left remaining on the Western Shore of Mobile Bay.

Thank you.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. As a Florida resident, this is very important to our land and it's coast's...we need to rebuild asustainable fishing habitat, and let the fishermen keep their lively hood..and no one wants to swim in tainted waters,,,most of all the fish and wildlife.. Big Oil needs to permanently leave, but first fix all the damage they have done! Down with big Oil...we don't need you anymore..we have alternative solutions for energy..stop killing our universe, our oceans and all the habitat...just stop and go away!

Dear Attention: Draft Comprehensive Plan,

As a resident along the Gulf Coast of Florida, I am very interested in the restoration of our beautiful coastline. I am glad to see that the RESTORE Council's draft updated plan addresses large-scale projects, which are so important for achieving ecosystem-scale restoration.

In addition, I hope you will:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. It is my home, but it is an important ecosystem that is important to all Americans.

Dear Attention: Draft Comprehensive Plan,

Years later recovery from the massive oil disaster in the Gulf of Mexico is still a huge challenge for the region. I want to praise the drafters of the Comprehensive Plan Update as a step towards science-based restoration of the Gulf Coast.

Particularly we need systemic ecosystem recovery and I look forward to learning how that will be achieved, and think it is important to analyze the interactions and synergies between different strategies to achieve this.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Dear Attention: Draft Comprehensive Plan,

I am writing today to declare myself an eco-activist.

By signing up with Environmental Defense Fund, I have joined a dynamic and involved community of more than 750,000 members and activists. We are all working together to protect wildlife, safeguard human health, and combat climate change to make the world a better place.

As an elected official, you're in a unique position to help us - - or hurt us.

So I wanted to let you know that I am paying attention. Thanks to EDF, I am staying informed. And I expect you to join me in standing up to protect the environment.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

I have long thought that the gulf states and residents got short shrift in reordering their lives and being adequately and fairly reimbursed for all that they lost!!! It is time to treat them fairly, so that they may participate in the rejuvenation of the environment in the gulf!!

Dear Gulf Coast Ecosystem Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to

advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

We need more conservation and preservation for our SE TN, N GA areas such as the areas of Apison, E. Brainerd, E. Hamilton, summit, Collegedale, Harrison Bay State park, Ooltewah, and into McDonald, Lebanon, Flint springs, Black Fox, Oak Grove, Flint Springs, Blue Springs, Old Lead Mine Valley, and into the Red clay State historic park, and adjoining areas of Cohutta, Cherokee Valley Ga and areas around these. Though we have been in a major drought, these areas have wetlands, streams, lakes, swamps, natural springs, etc. These areas are upon a (miles big) long known about sinkhole/cave through which much waters flow into and through these areas, on it's way to feed into other SE USA waterways, such as that of the Conasauga, Coosa, Tallapoosa rivers, and eventually into the Mighty Mississippi river(and its Delta). Though I am sure that it's true that the long argued about Keystone pipeline, could potentially be used to contaminate the waters elsewhere in the nation, these areas listed above, are much closer into the "network" of flowing waters, above and underground that could possibly suddenly contaminate these waters and others, into the international waters of the coastal waterways and generally the oceans of the world, possibly killing much wildlife used for food, and other vast wildlife also, given the magnitude of a possible spill, etc.

These lands, as described in the above need to be kept as quiet, rural and sparsely populated

rural areas, as was stated in the 70s, and is still true at this time also. These areas do not need more forced or coerced ex/sub/urbanization, rezoning of lands for other uses, annexing in of parcels of lands, into "other" areas that are too be used for other things. These practices need to be stopped, permanently and immediately to protect the endangered/migratory/threatened species in these areas in SE TN, N GA areas, known for their large amount of biodiversity, and for their natural fisheries that the fish tend to utilize and spawn more, there in the wild rivers and waterways of our nation. We need more New Deal Democrats put into office on all levels of government, on state, local, Federal levels and in the business sector also.

These areas need more protections that are best for each area, by the National Park Service, National forest Service, EPA/DOI, UNESCO, ICUN, and other (non state or local, or TVA) help that will be more democratic.

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I'm glad the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of these projects, both through improved submission guidelines and more robust science-based review for proposals to the Council itself and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent and inclusive and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The survival of Kemp ridley sea turtles and many other Gulf Coast species damaged by the Deepwater Horizon oil spill depends on the effectiveness of the final plan that goes into effect.

RESTORE Council

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a

lifetime opportunity to its fullest potential. As a child, my family and I vacationed every summer in Port Aransas, Texas. We loved seeing the dolphins who accompanied the ferryboat.

Therefore, I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Yirat Sh'mayim means fear of heaven, God.

God, Jesus, & the Holy Spirit is the bestest, greatest, most awesome sexually is the Lord God that Jesse Duplantis saw up in heaven cuz I've given that honor to them cuz they are better sexually & nonsexually than everyone.

Saves, Heals, & Delivers!

Yay!

What group are you in?

Examine & Judge yourself only [1 Cor. 11]

(God's people perish for lack of knowledge. Knowledge is the bible. Unbelief keeps you from believing so get rid of it. (Romans & Hebrews). (God made everyone to hear his voice Deut. 4:36).

James 3: every animal, every fishes, serpents, sharks, whales, etc...has always been tamed the only thing that has not been tamed is the tongue (every human being).

(Rom. 1:25: Who changed the truth of God into a lie, & worshipped & served the creature (devil) more than the Creator (God) who is blessed for ever. Amen

[KJV] (Romans 1...) - REPROBATE...unrighteousness, fornication, wickedness, covetousness, maliciousness; full of envy, murder (to hate is to murder), debate, deceit, malignity, whisperers, backbiters, haters of God, despiteful, proud, boasters, inventors of evil things, disobedient to parents, without understanding, covenant breakers, without natural affection, implacable, unmerciful...

CARNEL (1 & 2 Corinthians & Ephesians 4 & Galatians 5:17) - Adultery, fornication, uncleanness, lasciviousness, Idolatry, witchcraft, hatred, variance, emulations, wrath, strife, seditions, heresies, envy, murders, drunkenness, revellings, &...

UNFORTUNATELY NEED DELIVERANCE FROM DEVILS. There are many that need deliverance from devils unfortunately. [Matthew 4:23-24] & Jesus went about all Galilee teaching in their synagogues & preaching the gospel of the kingdom, & healing all manner of disease among the people & his fame went throughout all Syria: & they brought unto him all sick people that were taken w/ divers diseases, torments, those which were possessed w/ devils, & those which were lunatick, & those that had the palsy, & he healed them.  
Jesusetmefreeministries JSMF-M.org coming soon.

FREE (Hebrews 12:23) - Church of the Firstborn (born again John 3:3), baptized w/ the Holy Spirit & fire having your name written in heaven Lamb's book of life [Revelation 20:12].

Love Always and Forever,

Carol A. Yandora-Fehlman & every animal, every stuffed animal, every whatever they are sharks, whales, etc...from genesis to revelation.

Allow God, Jesus, & the Holy Spirit is the bestest, greatest, most awesome sexually is the Lord God that Jesse Duplantis saw up in heaven to save, heal, & deliver you everyday cuz they know what everyone (every spirit, human being, animal, stuffed animal, whatever they are sharks, whales, etc...) needs to be delivered from even when we don't. Every human being sinned that's why every human being was, is, & will always be mean, terrible, greedy, selfish, & insecure

from genesis to revelation [Genesis, Romans, Titus] & that's why every human being should of always repented & made sure God, Jesus, & the Holy Spirit did everything through everyone [1 John 4:9]. It's good for those that repent and bad for those that don't [Revelation]. Every human being should of always read the bible or better yet listened to it on dvd 24-7 (KJV on DVD Totally Kool!). Every human being should of always kept sin out of their lives so that everyone could of experienced the AWESOME POWER OF GOD, JESUS, & THE HOLY SPIRIT knocking everyone down & changing everyone from glory to glory (Romans, Corinthians). Every human being should of always had the mind of Christ (mind of Christ is saying what the bible says). If you are getting mad reading this letter than you are either reprobate [Romans 1..., 1:32, 6:23...], 1:21 cuz every human being should of always given thanks, praise, & glory to God then human beings wouldn't have become vain [Ephesians 4] in their imaginations & their hearts wouldn't have become foolish & darkened, Rom. 1:22 then human beings wouldn't have been professing their wise when their fools. The only wise ones are God, Jesus, & the Holy Spirit & if you are in them then you are wise but not in yourself only in them. Apostle Paul writes & tells all stuff from Romans to Philemon. Listen to all of it & over & over & over again continuously & if you have the bible on dvd then you can leave it on 24-7 from genesis to revelation. Yay! Or you could be Carnel [1 & 2 Corinthians, Galatians] envy, strife, divisions,...1Cor. 11:30 - examine & judge yourself only...cuz that's 1 of the causes many are weak, sick, & sleep]. Saying your Catholic, Lutheran, Mormon, Methodist, Jehovah Witnesses, or whatever denomination is saying you are carnal (1 Cor. 1-3...) cuz human beings should of always said Hebrews 12:23 Church of the Firstborn (born again), baptized w/ the Holy Spirit & fire, speaking in tongues the heavenly language (John, Corinthians) the best language & the Hebrew language also. The Jewish people have the best God, language- -Hebrew, & voices. Or you could unfortunately need deliverance from devils [Matthew 4:23-24]. Every human being should of always obeyed, trusted, & relied on God, Jesus, & the Holy Spirit & counted everyone and everything as poop [Philippians]. Cuz no one or nothing is worth having unless you have God, Jesus, & the Holy Spirit with it. Every human being would of always loved the bible & made sure God, Jesus, & the Holy Spirit did everything through everyone from genesis to revelation [1 John 4:9]. Receive correction from God, Jesus, & the Holy Spirit or otherwise you'd be bastards (Hebrews). Awake to God, Jesus, & the Holy Spirit so everyone can experience what truly loving & caring for everyone feels like & start living according to the Spirit of God, Jesus, & the Holy Spirit & not the crappy flesh [Gal. 5:17], having the mind of Christ & always making sure God, Jesus, & the Holy Spirit is the bestest, greatest, most awesome sexually is the Lord God that Jesse Duplantis saw up in heaven does everything through everyone [1 John 4:9] from genesis to revelation. James 1:21 - Pure religion is to visit

the fatherless, widows, & to keep yourselves unspotted from the world (sin). Always take care of the animals, sharks, whales, etc... [Gal. 5:19] Adultery, fornication, uncleanness, lasciviousness, Idolatry, witchcraft, hatred, heresies, envying, murders, drunkenness, revellings, & such like: as I have told you in time past that they which do such things shall not inherit the kingdom of God. Keep yourself spiritually & physically fit. Bodily exercise profits little [1st or 2nd Timothy]. Say NO to the crappy flesh & YES to the Spirit of God, Jesus, & the Holy Spirit. Repent, get born again, grow in Christ & attend a church that believes the whole bible, speaks in tongues (heavenly language), has the anointing so God, Jesus, & the Holy Spirit can knock everyone down and change everyone like they do @ Benny Hinn Crusades, then they give everyone the power & authority to be the witnesses of God, Jesus, & the Holy Spirit cuz everyone needs that from genesis to revelation. Always remember simplicity & sincerity. Animal Palaces, & Animal Places & Animal ambulances, Animal food trucks should have been in every city of every state & every city of every country cuz it's not right to run over any living thing & leave it there and call it road kill. Imagine yourself getting crushed by vehicles. Every human being should of always taken care of every animal, every whatever they are sharks, whales, etc... every stuffed animal making sure they had unpolluted clean water (garbage & glass free lands & water) from genesis to revelation in Jesus name. Amen means so be it. Be not ashamed of the gospel cuz the Apostle Paul wasn't [Romans]. [1 John] Those that love & not sin belong to God. Those that hate & sin belong to the devil.

Founder and President of Ora Estuaries. Works with oyster reefs to create living coastal infrastructure, I speak as a business owner and as someone who works on coastal restoration. I appreciate the commitments to large-scale restoration and the independent science panel. I also like coordination from different funding groups. For scale, there's different ways of scaling things. Bigger projects like diversions and marsh creation and shoreline protection, land acquisition, etc. Diversions don't scale. Marsh creation scales. For every unit you put in you get another unit of output. That's linear. I have a hypothesis that for oyster restoration you can do better than linear scale. How to tap into that? If you commit to being innovative and inclusive you will get everyone knocking on your door. How to separate wheat from chaff? Small magnitude RFPs (requests for proposals) for ecosystem metrics. Do large or small-scale metrics without adverse impacts, take those things that work and then scale them.

Director, Restore the Mississippi River Delta. First of all, a heartfelt thank you. Collectively, the Restore the Mississippi River Delta has been very involved to help direct the revenue from the civil and administrative penalties to do the work you are doing. At this stage, we are feeling about as good as we can feel about this work and the willingness to continue trying. Second, a couple of items that were part of the agenda, just to emphasize the idea of large scale is essential for us here. The land we are on here is a gift of the River. Back to history, that is how it came to be in the first place. Large-scale is the only opportunity to do this at the scale that matters. Third, the coordination aspect of it. Because you have multiple platforms that coordination is essential and having stakeholders understand how that process works is essential. Finally, synergies. You have done a great job talking about synergies, especially financial synergies. Synergies are also ecological synergies. When you look at the numbers and the resources, please look at those synergies. I also want to focus on one project. The effort to look carefully at the operation of the lower River. Integration of restoration and navigation, the ability to look hard at that and really move forward on that is key. Make that happen as we move forward.

We have shovel-ready the whole project for dredging of South Pass. Wildlife management area on the east side of South Pass is shovel-ready. Todd Baker with Wildlife and Fisheries has been giving updates to the Corps for several years. Our process is the development of Port Eads. We want to build marine wetlands for education for the Bird's Foot Delta, estuaries and ecosystem, for young people to come down to see and also learn about Deepwater Horizon. 40 miles from the spill at South Pass. One of my cohorts is here to discuss further, but please consider putting this at the top of your list.

National Wildlife Federation, representing National Wildlife Federation's Gulf Restoration Program and Restore the Mississippi River Delta, Thank you. It is important to tackle this as a Gulf-wide problem that requires large-scale comprehensive solutions. Need to tackle the Mississippi River Delta, tackle problems of all the states such as in Texas, Mobile Bay, Mississippi Sound, Florida, etc. The key is to take a hard look at the resources that are available. We have a lot of money but it's not enough to do everything. We have to pick those projects that have Gulf-wide implications and Gulf-wide success. Our partners are preparing written comments. Challenge now on this great plan is to pull off the greatest ecosystem restoration efforts. Geographically nobody has ever tackled something so big as the Northern Gulf of Mexico. We hope very much that we can see success and in 15 years look back and be very proud of what we have accomplished. Thank you.

Port Eads Fishing Refuge Nonprofit from Plaquemines Parish, Designed to run Port Eads facility for benefit of Plaquemines Parish and the State. Comments are specific to the Mississippi River Delta focus area. Modified reconsideration for Oct 2014 submission for Pass a Loutre using dredge material from Pass a Loutre Mississippi River area. We believe this project meets all four priority criteria. Highlights are the wildlife management area is 40 miles from Mississippi Canyon block 252. Would create 648 acres of net new wetlands at a cheap and competitive price. It's sustainable. We have partners in Wildlife and Fisheries, Wildlife Management Areas, etc. and all have done a great job building wetlands and increased water flow would help. Navigation dredging has created thousands of acres including in the Bird's Foot Delta and without coastal restoration dollars. This would make South Pass safe. With the Eastern Gulf of Mexico opening up for oil and gas, Southwest Pass could be opened up as a safety valve if a spill or accident takes place. The Lower Mississippi River port complex is the largest in the world and today our main tributary South Pass is not navigable. The area represents 80% of Plaquemines tourism. \$1.1B of economic impact annually goes to fishing in

Cabo, \$600M to Costa Rica. South Plaquemines and Venice are the most fertile fishing grounds in the lower 48. Areas of Port Eads are not accessible. LUMCOM (Louisiana Universities Marine Consortium) etc. and LSU and LDWF (Louisiana Department of Wildlife and Fisheries) would put research vessels there and could make it an outpost for monitoring progress. It's permitted, shovel ready and we would appreciate the opportunity for you to take another hard look at it.

Managing Director for Business Council of New Orleans and the River Region, Nonprofit public policy organization, We are dedicated to addressing quality of life issues in New Orleans such as coastal restoration. Business leaders understand that restoration is urgently needed to build businesses and raise families. This is central to economic survival. Proceeding expeditiously would help shipping, oil and gas and other business sectors including fishing and would also provide a tremendous economic boost to the region. I have seen significant job growth in the job sector for water management even before Deepwater Horizon. Water management is the biggest growing sector in the region. I appreciate the Council's recognition of large-scale projects like sediment diversions and hope the Council will fully consider synergies like how projects build off each other to get maximum benefits. Similar to the Louisiana Master Plan, this is a once-in-a-lifetime opportunity and we want to make sure federal and state agencies get it right. The Business Council of New Orleans and other business leaders are watching closely, because this is critical to the future success of our region.

Outreach Coordinator, Louisiana Wildlife Federation, I commend the Council for refining the plan and for the selection of projects, especially inclusion of 10-year strategy and commitment to engaging the public and transparency and collaboration with other partners. I highlight that although the 2010 spill was devastating, this is a unique opportunity to maximize as much as possible for large-scale restoration. I am happy to see projects such as Maurepas Swamp, Biloxi Marsh to help restore areas damaged by MRGO (Mississippi River Gulf Outlet).

Vanishing Paradise (Outdoor Fishing Show), National Wildlife Federation. I have been coming to meetings since I was 9 years old. I am glad to see some things are getting done but so much left to do. Cat Island south of Leeville has disappeared in my lifetime. I have fished that since I was 6 or 7. And Pelican Island. It hurt a lot. I'm 13 and I can tell you where land has disappeared. On the Outdoor Fishing Show, every time we go by Dularge and everywhere, we pass by areas that have disappeared. And the gates that people put up preventing local fishermen from getting into certain areas hurt everyone. Please don't spend public dollars on areas the public can't get to.

One of the things I'd like to urge you to do is to broaden the scope of your operating mentality, basic policies you use to decide on what do with money available. Consider how we might be able to have more impact with the same amount of money if we included more completely the private sector in the work that you do. To me, our entire effort here seems to be "restore". The idea that we have lost a lot and what we will do is to put it back where it used to be. That is like a relief project. We would get better impact on funding and have more public support if we consider this like a development project. We have tremendous resources in the coastal zone. Don't let it go back to nature. We should be developing that zone in a way that not only creates storm protection and surge protection as we know marsh can dampen waves. A levee obviously does a lot of good in protecting from strong storms. If one levee is good, why not two more? One thing I have come to understand is the Corps doesn't understand the benefit-cost ratio of any levee. What does it mean in terms of reduced insurance cost if we put up another levee just south of St. Bernard? Another aspect of this, what if we installed other types of levees or

barriers? Close to land could be levees, further out could be bulkheads. The important part of getting private sector to work with these is these barriers would be the place of attachment for businesses. One example is vertical oyster reefs, which could quadruple production if we can work out how to arrange for vertical oyster reefs to produce barriers. One example of this is where they brought the stone in from out of state - only protects from wave action. There's other ways to do that like with a vertical oyster reef. I urge you to consider to broaden the base of what you do and bring in the private sector more.

John Koeferl, Lower Ninth Ward, I have been following this process for quite some time. I am impressed to see that this is a science-based process. This is so important to us because everything you will deal with has state's agreements and laws. Science has to start regardless of that and not looking at all that. When a plan was done for a diversion in St. Bernard, it was started by saying we can't consider Pearl River water because there's an agreement about that or Lake Pontchartrain or Bonne Carre Spillway because we have an agreement. Well we need an open and transparent scientific process so we can figure out what agreements among states might need to be changed to accommodate the big picture.

Dear Gulf Coast Ecosystem Restoration(RESTORE)Council:

On behalf of the Mississippi Coalition for Vietnamese-American Fisher Folks & Families(MSCVAFF), we respectfully request a fourteen (14) day extended public comment deadline from October 7,2016 to October 20,2016. An extended public comment deadline will be very helpful due to the current shrimping season and the additional time needed for outreach, dissemination, address language access needs & submitting comments. Further, we need extra time to review both the translated Draft Comprehensive Plan Update and the fact sheet.

Thank you in advance for your consideration.

Incredibly grateful you are here, and grateful the Comprehensive Plan Update was done so quickly. You have worked magic to update the plan prior to the election in November. My comments revolve more around questions. Water quantity is a phenomenal addition, but how do you deal with water quantity issues within 25 miles of the coast when so many of those issues are upstream? Personally support the inclusion of building flow-through bridges along the Causeway that would allow for more fresh and saltwater exchanges between the Delta and Mobile Bay. Thank you for the constant feedback and collaboration. I love that you are working with all three sources of funding and trying to put all those pieces together, and on the whole, what the Council is working to do as a staff and team. Alabama is very lucky to have the NRCS as the central point for all three funding sources, and we support having them collaborate and connect together as much as they can. We appreciate what you're doing in making sure that the public's thoughts and concerns are in there. The concern we always have is the addition of the economic piece to Pot 2. We ask that you make sure the state expenditure plans also match all 5

goals of the Comprehensive Plan. We have always worried about the economic component the Federal Restore Council is charged with overshadowing what we agree is the most important, the environment. Please make sure to go back to states to ensure they meet the standards of both Bucket 2 and Bucket 3. Urge the Council to showcase that every project we put together is going to have a significant economic impact.

Thank you for getting the updates released long before the required release date. We know it was a lot of hard work and recognize that the council put in good diligence (and the staff as well) to get the update done. We applaud commitment to region-wide planning which is critical to ecosystem health, and the commitment to maximizing the measurement of positive impacts of projects through improved project submission guidelines. Also support the importance given in the plan to collaboration and coordination. Whole heartedly support a project review panel that looks across projects, coordinates with other project review teams, including the NRDA Monitoring and Adaptive Management Cross-TIG working group to assess cumulative benefits and identify and adapt projects across funding streams.

The NWF wants to applaud the council and its staff to its commitment to prioritize the plan and update it prior to the scheduled required release date. Overall, very pleased with the contents of the plan update, it is a strong draft blueprint to guide the Council in the future. We appreciate the dedication to large-scale projects that are viable for long -term sustainable health, particularly in the Mobile Bay and Mississippi Sound. We urge the Council to look at future FPLs that coordinate planning and partnership opportunities. For example, the USDA announcement today of \$328 million three-year restoration strategy as a continuation of NRCS's Gulf of Mexico Initiative (GOMI). Regarding project synergies: We support an integrated proposal review and selection process, we support a panel to assess how project and panels could interact, and urge the Council to include external expertise on the panel. The Council has acknowledged the call to a firm commitment of collaboration. We look forward to the meetings and workshops in months to come. We hope the council will communicate the next steps and outcomes from those workshops to demonstrate how this cross-agency collaboration is developing and moving forward. We also appreciate the webinars the Council has been

providing, they are a good outreach tool. In terms of coordination, I'd like to compliment the states of AL and MS for attending other Council meetings in the region. I also wanted to highlight a quite memorable quote from page 1 of the Comprehensive Plan Update - "The task of restoring the gulf environment is a multi-generational undertaking" - The last 6 years of work that many people in this room, and outside this room, have done to guide the process forward is only the beginning of this effort. The Council is poised to take the long view of restoration.

So excited that USDA has taken the lead of the Council for several reasons, including that fact that they are concerned with citizen engagement and involvement. You all have a track record of having to address discrepancies, and having to form committees to address underserved directly impacted communities. With USDA as the lead this will not be so difficult, as they have experience working with small black farmers and underserved communities. I'm appealing to the Council to take advantage of that. To the State of Alabama: We had low expectations and you met them. We are still very gung-ho about this once in a lifetime opportunity for including real, unincorporated, directly impacted communities that are bearing a lot of the impact from the spill and needs this ecosystem restoration. This opportunity has never been here before, and will not be here again. We are very excited about the collaborative partnerships. The intersection of agencies is important to achieve cumulative positive impacts as opposed to the cumulative negative impacts that our community has been experiencing. We hope that the priority criteria in the plan are considered a living document and not set in stone. We're here and available for

input and engagement. Thank you. We're looking forward to this process which we believe is much better than the first. We know this is a living organism and look forward to the Council being flexible in this process.

Thank you to the Council for taking proactive steps, including translating the Fact Sheet and the Draft Comprehensive Plan to Vietnamese. I know that the Council has given the public 45 days to comment on the Draft Comprehensive Plan. I'm here to ask for an extended deadline. Requesting 2 extra weeks to review because it will take additional time for us to get the document into the Vietnamese community's hands, and for them to actually submit their comments in time. This is my key recommendation and request at this time. Another key thing is that it is shrimp season all over the Gulf states, and we have not had enough time to go down to the docks and disseminate all of this information. We also look forward to the picture of coming meetings.

Dear Gulf Coast Ecosystem Restoration Council,

Nationwide many people look to the challenging efforts to restore the Gulf Coast after the BP oil spill as an opportunity to make it right - for animals, for the ocean and for people. I am one of the many folks who appreciate the hard work and dedication of so many people who have stepped up to take actions for restoration. Thank you to everyone who has participated and special thanks to you who serve on the Restoration Council. Please do your best to craft as strong a restoration plan as possible.

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

I urge the inclusion in the appropriate place in any relevant document or plan to identify Corexit as a dangerous chemical, a dispersant, to be excluded in any operation related to oil spills. This chemical causes the ability to accumulate oil virtually impossible leaving tiny particles to drift downward to the Gulf floor, further contaminating sealife.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Gulf Coast Ecosystem Restoration Council,

I don't think we have any idea of how poor our world would be without birds and wildlife. Our coastal regions deserve our greatest concern!

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

P.S. I am a member of the SW FL Shorebird Stewardship team who spent weeks and hours protecting a large flock of nesting Black Skimmers only to have the entire flock decimated (nests, eggs and chicks) by several Ring Billed Gulls. Can Audubon approve a plan to exterminate the gulls next year from our wonderful protected sanctuary of Skimmers?

Thank you for the opportunity, thank you for coming to Morgan City. Restore or Retreat started 16 years ago with the mission to aggressively implement large-scale restoration. We support that aspect of the plan. Also, our organization was founded on the basis of going back to natural processes in our basin. We support going back to natural processes, and fully support the inclusion of the natural processes of sedimentation and freshwater diversions. We fully support the science-driven decision-making process as you go through the plan itself. We have seen in the past how these efforts support successful restoration. We will also probably submit written comments and work with other partner for comments on the Barataria-Terrebonne footprint of the basin.

The Commission is responsible for service for over 90% of deepwater oil & gas operations in the Gulf of Mexico. We are going to submit comments later but appreciate everything the Council has done: The work, the plan, your commitment to coming out to Morgan City. We are also happy to see a commitment to the large-scale ecosystem restoration projects. Especially collaboration with NFWF and NRDA and CPRA and all the other programmatic entities and authorities. Port Fourchon is a perfect example of how environmental restoration is economic restoration. The inherent benefit of landscape restoration is protecting economic infrastructure. We encourage the Council to select the next generation of projects based on most urgent ecosystem needs. The economy will benefit from that. But if economic impacts are imposed as a screening criteria on front end then that could divert funds to less resilient ecosystem projects. You can't have an economic project without a natural buffer in front of it.

First off, I commend the Council for your diligence, and for keeping this thing going. The first time I ever heard a presentation about coastal land loss was in the mid-90s and everyone was not convinced at that time that we had a problem. They estimated it would be 16 billion dollars to fix our coast. We all know that is a pipe dream now, and we have to stay the course to get this done. Even when those RESTORE dollars run out, I hope the council is still going to be active in the future. I cannot even comment on all the good that has been done with projects in our state. Recently I had the opportunity to visit the Elmer's Island project and it is beautiful and amazing. You really need to be commended for that. I'd also like to comment not just on the coast but some of the Pot 2 suggestions in the Maurepas Swamp area. The Maurepas Swamp is dying a long death, it really needs revitalization. I first heard about the Maurepas diversion in 1991. It was funded then for engineering and design. Again in 2007, and 2014-2016, I have emails about it, and we're so glad to see it is still alive. It is an important part of coastal restoration. It is a proactive approach. I commend y'all for that and for protecting that money. We all know how it has been attacked and we really have to be aggressive in keeping those dollars where they need to be kept. I'm from the Dularge/South Terrebonne area where there

was a project a few years ago - Lake Mechant Landbridge. What we really need to look at is that we are shocking these ecosystems. They are degrading and switching from fresh to salt. But now the land bridges are turning the insides of project areas completely into fresh water. This year we are experiencing a bloom of invasive vegetation, of hyacinths. Before the year is over we are going to have canals that are normally open that will be closed and you may have parishes coming back to ask for long-term maintenance dollars. We need to discuss this. Timbalier Island is in dire need of maintenance. I don't know if that will come from RESTORE but it needs to be maintained in the long run.

Welcome to Morgan City. Thank you for being here. I have all good news. Everyone gets up here and talks about problems. We've done everything you are talking about doing without a lot of assistance. We have the only two growing deltas in America. Wax Lake and Atchafalaya are growing without anyone doing anything. I'm here tonight to tell you if you want to help grow stuff, build stuff, we have everything you need, we just need your assistance. I don't care what bucket it comes from, we just need your assistance. In last 20-30 years, we have created 1/3 of all beneficial use land in the entire state and it was done by accident. Not to restore barrier islands. It just happened because of the river. We are not leveed past Morgan City. Atchafalaya Wildlife Management Area is one of the largest in the state. Besides the thousands of acres we have created, it's a wildlife habitat. The wildlife is amazing. 40,000 acres surrounding the island is bird habitat. Migratory birds, wading birds, it's a perfect habitat. If you want to double that, expand that, please talk to us. The material is there and doesn't have to be moved long distances away. We have everything you need to grow the habitat and vegetation. Thank you very much for listening.

Appreciate the opportunity to comment. The Gulf of Mexico has been a long term priority for the Nature Conservancy, as has the Mississippi delta and coastal ecosystems. We're really excited about this plan. First, we want to thank the Council members and Council staff for the hard work and collaboration to get this revision done in this amount of time. Some particular things to highlight that we are supportive of in the Plan - First, the importance of cooperation and coordination among agencies and funding sources associated with Deepwater Horizon; Reaffirmation of the watershed approach; Commitment to large-scale projects, which are important everywhere, but especially important in Louisiana; Reliance on natural processes to support ecosystem integrity; Exploration of creative conservation funding; Commitment to public engagement and reliance on science-based decision making. We look forward to working with the Council and its members in the future to implement the plan. We, along with other NGO colleagues, will be submitting comments.

I would like to see 100% o the penalties put into ecosystem restoration within the targeted geographic locations. These funds should only be used where local impact can be measured scientifically as much as possible. They do not belong to projects miles away, used as political chips. There needs to be a higher level of transparency and accountability than usually experienced in government spending today.

The direct financial support of businesses, jobs and tourism can and should be obtained from separate funds. Ecosystem restoration itself will indirectly support these same worthy areas of commerce.

We have seen and experienced such waste in government spending in our region, particularly in the aftermath of Katrina! The irony is that there is and has been great financial need at the same time. Unfortunately, the areas of spending and greatest need sometimes do not overlap.

To summarize: spend all of the penalties only in the locally impacted areas (with scientific proof of impact as much as possible) and with the highest levels of transparency and accountability.

Thank you for your hard work and diligence and good luck!

Dear Gulf Coast Ecosystem Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and still are reeling from the long-term oil residing just below surface on islands and wetlands in and surrounding the Gulf. I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

Dear Gulf Coast Ecosystem Restoration Council,

NOT ENOUGH WAS DONE, FAST ENOUGH. CORPORATIONS STILL HAVEN'T  
LEARNED TO TAKE FULL RESPONSIBILITY! I care about the future of the Gulf Coast and  
want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an

advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

Aside from all the people who are very serious about this restoration, my husband and I are serious birders who, like other birders, enjoy the watching, and keeping track of birds. We follow their habits and numbers and their fragile environments. Some take stats and band them. We can never turn back the clock but we can try our best to help improve the Gulf's health for birds and sea life.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through

improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

Dear Gulf Coast Ecosystem Restoration Council,

\*\*\*For decades, the oil companies slashed and burned their way through Gulf Coast en route to the construction of pipelines, shipping channels, and other infrastructure, while upstream

mismanagement of the Mississippi River has simultaneously starved the Gulf Coast of sediment while flooding it with surplus nitrogen fertilizers. The Gulf Coast has become a dismal, tattered sacrifice zone that cannot protect the adjoining states from the hurricanes that will be more frequent in the future, and cannot provide the spawning nurseries for the oceanic species on which the local seafood harvest depends. If the Gulf is to bear any semblance of ecological health and productivity for those generations of people and creatures to come, the Council must devote its full effort and financial resources to genuine restoration, without deference to immediate development interests or accommodation of ongoing collateral damage from oil companies.\*\*\*

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft

updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

\*These turtles and other sea life or coast life are worth saving.

**Correspondence Text**

Dear Gulf Coast Ecosystem Restoration Council,

On behalf of the Defenders of Wildlife, please accept the attached comments on the Gulf Coast Ecosystem Restoration Council's Draft Comprehensive Plan Update, in addition to those I presented verbally at your September 12, 2016 public hearing in Panama City. Founded in 1947, Defenders is a national non-profit conservation organization focused on wildlife and habitat protection, the protection and recovery of endangered species and the conservation of biodiversity. Defenders has over 80,000 members and supporters in Florida. Defenders is actively monitoring the BP oil spill restoration planning activities of Florida's northern Gulf coast counties.

Defenders support the Council's updated goals, but we encourage the Council to select projects in the future that will directly protect existing, but unprotected wildlife habitat along the Gulf Coast. There are important unprotected areas of wildlife habitat adjacent to the St. Marks National Wildlife Refuge, Apalachicola River and Tyndall Air Force Base whose acquisition would accomplish your goals and objectives related to restoring and conserving habitat, restoring water quality and quantity, replenishing and protecting living coastal and marine

resources, enhancing community resilience, and restoring and enhancing natural processes and shorelines. Additionally, there are willing sellers, and funding and land stewardship partners to help ensure immediate and long-term success. Please consider adding land acquisition to your "tool chest" as you select and fund future projects.

Thank you very much for considering our comments.

Kent

Efforts need to be made to encourage cities not to undermine the goals of Restore Act.

The city of Gulfport presently has a 404 request to fill in over 400 acres of wetlands.

In Jackson a dam is proposed on the Pearl River. This will affect water coming the River negatively.

On the Pascagoula another dam is proposed which also go against the goals of Restore.

Efforts need to be made to educate local decision-makers of wise, sustainable practices. Local municipalities could benefit from information about hydrology, biology, sustainable development, green infrastructure and the value of wetlands.

Often these officials are only informed by the developer they are working with. That is the case in the three examples I cited.

Dear Gulf Coast Ecosystem Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that

were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

We need more New Deal democrat alliance coalition democrats to help with these and other conservation needs in our historic, and natural resource rich SE TN, N GA areas, not oppress them further. We do not need travel or real estate development construction in and around these areas of SE Hamilton Co, SW Bradley Co. TN and adjoining areas of NW GA. These (ongoing, currently used) historic and scenic tourism areas do not need gas/sewerlines, more development or paved areas, or above/underground construction going on in these areas which is upon a long known about (miles big) sinkhole which has not sunk yet, that has many waters flowing through it, feeding into the Conasauga, Coosa, Tallapoosa waterways and also eventually into the Mighty Mississippi river (and its Delta). These waters contain and support much biodiversity and its needs more protections, in all areas possible, and to also protect the vital clean drinking waters for people, state or local economies, and wildlife also.

These areas need protection from the National Park/or Forest service, EPA/DOI, Climate protectors, marine and other protectors of the environment to help protect these areas from becoming a major transportation, big business or real estate "hub" instead of the Ancient Sacred Council grounds of ancient Indigenous peoples. Turn the sprawl around the help Chattanooga and other towns sprawl back into themselves! These problems go wrong while in the planning stage and those responsible should be dealt with! Someone in office in business or government, needs to be held accountable for any current, future problems with public health, etc, that may be identified. President Obama needs to remain in office indefinitely to finish all these things he started but did not see through to a satisfactory end!

Thank you for this opportunity to comment. I have the following suggestions.

1. Broaden the goal to "Develop (economically) the Coastal Zone." "Restore and Revitalize"

focuses too much on rebuilding back as it was. "R&R" is a Relief Project with a "top-down" orientation. Instead, take a Development Project Orientation in which the private sector participates as investors. The overall goal should be Sustainable Economic Development.

2. Place most emphasis on the Goal to Restore and Revitalize the Gulf Economy. Focusing on creating a vibrant economy that maximizes the conservation (wise-use) of the tremendous resource will be the most cost-efficient approach to achieve the overall goal of providing storm protection to coastal communities. Including participation from coastal citizens and enterprises will build political support for the effort.

3. Evaluate potential projects on their ability to combine economic development with storm protection. A key criterion is the reduction in flood insurance premiums for each structure. Those structures/projects that will reduce flood insurance by the highest amount per-dollar-invested should be prioritized. Currently, I believe that we do not know the cost/benefit ratio of most structures, including a levee.

4. Construct a series of storm barriers that double as locations for sustainable enterprises, including: residences/camps, sports fishing, recreation, aqua & mariculture, agriculture, fish/oyster processing, solar power, biomass power, industrial processing, etc. Storm barriers would include levees on higher ground, bulkheads in shallow water, and floating structures in deeper water.

5. Create model projects that can be applied in many locations without re-doing the underlying studies. For example, create a diversion structure model. This should allow flood water to enter a reservoir until the sediment drops out; then, allows the water to flow back out to the "river" or to a special use, such as, salinity management. Controlling the water will minimize conflicts among citizens.

6. Recognize and promote economic participation, wherein, the private sector is stimulated to invest in the construction of storm barriers and the structures attached to them. This participation can be achieved through favorable laws, rules, and regulations and via subsidies to assist the private sector with its share of the investments. Stimulating private sector investment will leverage the available public sector funds to achieve more with true private sector participation than can be achieved by the public sector alone.

I wish you the greatest success in developing the coastal zone.

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Respect nature! Respect life! Respect Yourself! - Thanks!

Above and Below the Mobile Bay Causeway, a divided 4 lane highway US 98 and US 90, extreme slit accumulation has occurred. This is due to the dam effect that prevents original

water flow. Proposals have been made to improve this by converting four parts of the Causeway to bridges. I strongly support the proposals to enable the upper bay to flush as nature intended. Locations for bridges, in my opinion, should be 1. At the east base of the Spanish Fort Bluff at 30 degrees 40" 01.66 N & 87 degrees 55' 13.71 W to enable flushing of Bay Minette basin and D'olive Bay. 2. John's Bend 30 degrees 40' 12.71 N and 87 degrees 56' 17.51 W. 3. John's Bay 30 degrees 40' 16.54 N and 87 degrees 56' 42.24 W . 4. Chacaloochee Bay 30 degrees 40' 35.59 N and 87 degrees 58' 38.34 W. Bridges 1, 2, and 3 would be relatively short and bridge 4 would be as long as funds allow west to I-10 crossover. Thank you for considering my input, the need is obvious to any and all. The extreme silt accumulation has caused a massive over growth of aquatic weeds that has further impaired water flow, fishing, boating, and habitat for for basically all creatures.

I appreciate the opportunity to comment on the Gulf Coast Ecosystem Restoration Council's 2016 Draft Comprehensive Plan Update. I also appreciate the hard work and commitment of the Council staff and members to restore the economy and ecosystem of the Mississippi Gulf Coast.

My comments today pertain to the Draft Comprehensive Plan Update as it relates to the Oil Spill Restoration Impact Allocation, commonly referred to as Bucket 3. As the Council has outlined, The RESTORE Act and related regulations require states to submit a State Expenditure Plan, which takes into consideration the Council's Comprehensive Plan and is consistent with the "goals and objectives" of the Plan. Further, the 2016 Draft Comprehensive Plan Update states, "the council has also applied these objectives to the Spill Impact Component."

As drafted, the Council's 2016 Draft Comprehensive Plan Update does not include an Objective related to the economic recovery of the Gulf Coast Region. Goal number 5 addresses economic recovery, but the current comprehensive plan and draft update lack a corresponding economic

objective.

As such, I respectfully request that the 2016 Draft Comprehensive Plan Update be amended to include an objective related to economic recovery. Economic recovery continues to be a vital component of the post-oil spill long term recovery strategy in Coastal Mississippi, and it should be given full consideration in the Draft Comprehensive Plan Update. Moreover, it is clear in the RESTORE Act that Congress intended that the Spill Impact Component address both ecosystem and economic restoration activities. If State Expenditure Plans are required to show consistency with the "goals and objectives" of the Council's Comprehensive Plan, an objective for economic recovery should be added in order for states to meet the requirements and achieve a comprehensive recovery, which must include both economic and ecological components.

I appreciate your consideration of this matter.

### **Correspondence Text**

Dear Mr. Ehrenwerth,

I am writing to submit formal comments on the Draft Comprehensive Plan update document your agency is looking to finalize. As you are aware, the Greater Lafourche Port Commission is the entity responsible for managing Port Fourchon and the South Lafourche Airport. As such, we are responsible for servicing over 90% of Deepwater oil and gas exploration and production in the US Gulf of Mexico, we were ground zero Deepwater Horizon event, and about 1 in every 5 barrels of oil in the US passes through our port.

We greatly appreciate the consideration, and the work that the Council has put in to this planning process, their commitment to learn from previous experiences, and most importantly, their commitment to making the absolute most of this once in a lifetime opportunity to advance restoration right across the Gulf Coast, and especially here in coastal Louisiana.

It is very encouraging to see the Council's commitment to large-scale ecosystem level restoration projects, and the ideas regarding collaboration and coordination with NRDA, NFWF and other restoration programs and authorities which are contained both in the document and are a focus of the public consultation meetings you have hosted through this process.

We firmly believe that Port Fourchon is the perfect example of how environmental restoration IS economic development. Port Fourchon's existence demonstrates every day that the inherent economic benefits of landscape scale restoration - protecting and preserving critical infrastructure and economic corridors such as ours - come out in the end. This is why we encourage the Council to select the next generation of projects based on the most urgent ecosystem restoration needs and sustainable projects. The economy will benefit - as we have proved over and over again in Port Fourchon. However, if economic benefits are applied as a screening criteria to project selection at the outset, funding could unintentionally be steered to less urgent or less resilient projects.

Coastal Louisiana is losing land faster than any other area on Earth, and we need to make the most of this tremendous opportunity to make lasting and significant progress in retaining and restoring our coast, our community, our economy and our culture and we appreciate the tremendous efforts of yourself and the RESTORE Council to further this mission.

Sincerely,

Chett Chiasson, MPA  
Executive Director - Greater Lafourche Port Commission

Notes: title of email:  
WHILE THE DRAFT PLAN FOR RESTORING THE GULF OF MEXICO IS A GOOD  
START, THERE IS STILL ROOM FOR IMMEDIATE IMPROVEMENT!!

**Correspondence Text**

Dear Council,

ALL five species of sea turtles in the Gulf of Mexico are either threatened or endangered. Marine biologists estimate that somewhere between 61,000 and 173,000 sea turtles- -of all species and ages- -were killed during the 2010 BP 'Deepwater Horizon' oil spill disaster. Because the "ecological health" of the Gulf Coast must be restored ASAP, I want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the Gulf

Coast Ecosystem Restoration (RESTORE) Council's draft updated Comprehensive Plan expresses a commitment to advancing larger-scale projects, which are critical for achieving ecological system-scale restoration. I also applaud (clap, clap!) the RESTORE Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust sound science-based review, and through thoughtful coordination across agencies and restoration programs.

TO FURTHER STRENGTHEN THE GULF COAST ECOSYSTEM RESTORATION PLAN, I ENCOURAGE YOU TO:

- -Please commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- -Please make sure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in ALL Gulf restoration efforts.

Thank you for your efforts to update the 2013 Comprehensive Plan, and create a stronger legacy for the Gulf Coast! On December 7, 1972, the crew of 'Apollo 17,' the last manned lunar mission, shot the famous "Blue Marble" photograph of the entire Earth floating against the "black velvet of outer space." Released during a time of growing environmental awareness which I was directly involved with, this NASA photo became an emblem of global consciousness, the most widely distributed picture in human history. (NASA's dramatic "Blue Marble" photograph of the Earth from outer space gave us an eye-opening image of the entire planet for the first time.) According to the National Oceanic and Atmospheric Administration (NOAA), about 71% of the Earth's surface is covered by seawater. Despite our tendency to name different oceans (Atlantic, Pacific, Indian, Arctic, and Southern), there is actually only ONE OCEAN. (It is a connected body of seawater which has greater depths hiding bigger valleys and mountains of larger magnitude.) The perspective of oceanographers, marine ecologists, conservation biologists, and environmental/energy/conservation activists ("ocean advocates" like myself) maintains that the ocean is a 'finite resource' to be protected and sustainably managed (instead of an 'infinite sink' to be overexploited and polluted without regarding any of the consequences). IN CONCLUSION, AN IMPROVED AND TOUGHER GULF COAST ECOSYSTEM RESTORATION PLAN MUST BE A TOP PRIORITY OF

ANY HIGHLY EFFECTIVE OCEANIC CONSERVATION STRATEGY TO PRESERVE  
OUR MARINE ENVIRONMENT!!

Thursday, October 6, 2016

Subject: Please Strengthen the Comprehensive Plan

Dear Council Members:

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the humans, birds, and marine life of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for humans, birds, and wildlife alike.

"Then I say the Earth belongs to each generation during its course, fully and in its own right, no generation can contract debts greater than may be paid during the course of its own existence."

- - Thomas Jefferson

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

- \* Ensure that the coordination workshops and meetings in 2016 and 2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the

Gulf Coast. The people, birds, and wildlife that depend on a healthy Gulf Coast deserve nothing less.

"A thing is right when it tends to preserve the integrity, stability, and beauty of the biotic community. It is wrong when it tends otherwise."

- - Aldo Leopold

Thank you for your consideration of my comments. Please do NOT add my name to your mailing list. I will learn about future developments on this issue from other sources.

Sincerely,

Christopher Lish

San Rafael, CA

I'm with Projects 1273. I'm introducing the International Society for Wheelchair Professionals Disabled Community. I'm introducing Coastal Management Fellowship with NOAA; Fellowship Literacy Program. I'm introducing Master Naturalist Program. I'm introducing higher learning education and the STEM program, assisted technology World Health Organization. I have done this since 2012. I have international recognition in the hospitality state. I'm also introducing the personalized platform, individualized educational program. Reached out to many international countries to initiate a platform to accommodate the disabled community appropriately for research capabilities and implementations of projects. We have this associated program with this introduction and I have Military Veteran's Association; I've been invited to the Pentagon. I have a movie producer coming forth to do a movie as well. So we have this and Mr. Miller, Department of Resources, waiting for me to introduce it on the 20th in Hancock County. I got to come back down in 2010 and they write me a letter of interest, so I'm doing a PowerPoint presentation, Secretary of State, to handle appropriately for our best interests. To represent the hospitality state more appropriately. I have this and I have economic development. We bought a bottle-working company and have a contract with Sam's, Walmart, and all the

commissaries. Will build homeless domiciles. What it is - the power to become a productive citizen; we are offering the disabled community. We are offering therapeutic, stimulating options for them, incorporating this vision. It's called Safe Harbor Adaptive Sports, the Navy recognizes it, adaptive sports, Paralympics. I'm initiating my personal chapter of a Paraplegic Fish Rodeo next to the VA. So I've had this association going and I'm very proud and honored to be here. Thank you very much for your attention and cooperation.

Would you explain to the people about a project you started to help with the oyster industry and the island you're building to help with water quantity and quality in Bay Saint Louis? Will you also explain in these buckets what can be used for water quality and infrastructure and how all funding cannot be used to help every incident that the local communities have?

What does RESTORE Council mean to y'all? Everybody in this room will agree that this is our home and this is our Gulf, and our backyard. I'm very concerned about our ecology and Gulf, because we've been waiting how many years for y'all? It isn't y'all's fault; you all had to wait for the money. But that toxic dispersant is still out there and because of it we don't have work and our fisherman are still being exposed to it. There are 5 different pots of the RESTORE Council. Who's held accountable to all these pots? Are you all held accountable? Is everyone on this board responsible? You give money to the states. Who's responsible for the money to the states? I've heard all kinds of ideas. We build a baseball stadium? We're supposed to get Internet access? How does that restore the Gulf? If we don't clean up this dispersant and you don't clean up your watersheds, what's going to happen when a hurricane brings that stuff back in here? You say geographic locations, well it really isn't a geographic location; all the water runs together. Every watershed works together, so if we have a Hurricane Katrina, that stuff is coming in on us. I've done a lot of research and I've really gotten into dispersants. It's not a pretty picture and it really scares me. I understand that we have to do the right thing. But I also understand we need to think about our future and our ecology. The water needs to be cleaned. I don't know how to do it. I just know it scares me. I would like the oil spill to be cleaned up, so we can go back to our business [such as for fisherman]. Because, at this rate, we don't have any business. And if we get this cleaned up, none of us will have to worry about it anymore. I don't want that back in on me because I've already experienced it with my family. I don't want to do it again. It's not fun. You have to see it to believe it. I did a lot of research to know how to save my family.

I'm not sure, I've put in a couple of projects. I'm not sure what bucket they go in. The first time we this RESTORE act, I spoke hard on restoring the shrimp population here and across the Gulf of Mexico I've talked to our local DMR and they scratched their heads and looked at me strangely. Our shrimp population is not protected properly. I've mentioned this before. When I bring it forth, they we have to go by the law set forth in the 1970s. I say, yes you do, but what about changing these laws to properly protect shrimp instead of just haphazardly? They say they need science to back this up. Well, this is where my proposal comes in to fund science to prove what I'm saying. We have the possibility to have year-round shrimp in the Gulf, coming out of the estuaries, because we have commercial a fall shrimp and winter shrimp. But they're not protected at all. Another thing that I've hounded on for years is that this oil dispersant is still affecting the fisherman. It's still on their gear. I can testify to that because I handle it. It's obviously on their boats. I don't know what bucket that should come out of to be cleaned up. I think that should be cleaned up for these folks that are exposed to this year after year. I met a young gentleman and his lymph node system is swelled up obviously from this dispersant. I told him the signs to look for and he got back to me this spring and said it's still there; I'm still feeling the effects from it. I talked to the scientists about it and they said all the tests we run are coming back negative, but maybe they aren't looking for it right. I don't know. Thank you.

I'm a conservation biologist with The Nature Conservancy out of south Mississippi. I really appreciate the opportunity to speak. We are preparing detailed written comments on the plan and we will have that to you prior to the end date. First of all, we appreciate the hard work and cooperation of the Council in getting this revision done so quickly. It was an amazing job. We also support a lot of the specific changes in the plan. Most especially, we like the importance of the cooperation and coordination among agencies and funding sources that you're proposing. We like reaffirmation of the watershed-estuary approach and planning in restoration. We are already looking at some of these projects in Mississippi and the other states as well. We support the commitment to large-scale projects; we think this is absolutely the right way to go. We support the reliance on natural, ecological processes to restore and maintain ecosystem integrity. We appreciate your willingness to explore options to creative conservation funding. We really like your commitment to public engagement support. We are very supportive of your reliance on science-based decision making. Thanks again for the opportunity to speak and we look forward to working with the Council.

I also want to follow up on comments that were just made. I think you've done a really great job with transparency and outreach. I know this is going to be a long process but I really appreciate how much effort that must take. I really appreciate seeing someone from a neighboring state, from Louisiana here. That's really smart to show that that's the vision of the multifaceted approach to this that we're looking locally and globally out as far as all of the Gulf states. One thing I haven't heard that I'd like to repeat that has been in earlier conversations. As we're envisioning projects and we're presenting projects, to keep in mind that we need to have training and the work come from here on the coast as much as possible. We've always talked about Centers of Excellence, etc. and I know there are other efforts that are doing that. I want to have that be one of the pieces that we keep in mind as we're envisioning projects--to hopefully use as much local labor and training and to give as much knowledge from here as possible, to take advantage of what's going to be \$16 billion-plus of economic activity. On the projects themselves, I really like seeing that we're looking at water quality and quantity and that we're using science and I think that's really being done in a smart way. There have been a lot of good

studies. I would like to ask as we are doing the transparency and outreach, something that I've said to some of the members on the board. I know there are firewalls between what you can do and other decisions that are being made. When the RESTORE Act started, there were already a lot of projects that had been started. I would like to ask that we'd somehow inform people who are doing some projects that are maybe not wise (dams on the Pascagoula or Pearl), these clearly go against the water quality and quantity goals of the RESTORE Act. As much as possible, in your efforts and with your resources, please involve and inform local officials and decision-makers about the bad impacts of their projects.

Everything I planned to talk about has been addressed and has been addressed in a positive way. The gentleman who just spoke brought up an issue I think is very important. We recently had an attempt to put an oyster project in Bay Saint Louis (I live in Pass Christian). And that project was denied. As we came out of that meeting, one of our city officials discussed pollution of the

oyster reefs and how we need oyster gardens, which we do, just not in that situation. Well I pointed out that we have these huge culverts along the coast that are used to transfer stormwater runoff. He was very proud that they had put bigger culverts on the beaches in Pass Christian and along the coast. It is my understanding that the larger the culvert, the easier it is to transfer the stormwater runoff directly into the Gulf without any opportunity for dissipation. He was very uninformed, in my opinion. This comment made a few minutes ago underscores a wish that I would like you to consider--please take advantage of the opportunity to educate elected city officials about what's going on. If you'll recall after the oil spill, we had comments from our governor and lieutenant governor like 'the fish will swim away from it' or 'the odor that you smell from it burning is that is lawnmower exhaust', which is interesting because you could really smell it at night. I think education is important, especially for our city governments. It's a scary issue having these culverts; they've been there for as long as I can remember. I've been in environmental activism for over 40 years in Mississippi. I was appointed to a 7-year stand as a commissioner for DEQ. It's something that's always been there. These beach closings, we don't have as many oysters as we used to. I think it would help first and foremost to educate our city administrators.

We need oversight. There is a disconnect between the federal folks and local folks. What Gail said is perfectly true. Don't stop with the city officials, you've got county officials, state officials. Their idea of economic development is building--in Waveland, they built concrete ditches to drain stormwater, with FEMA money. We are using federal money to send water to the Gulf much more quickly. People forget that this money is actually federal money. If it was up to the states that collected the money that the federal agencies collect, we wouldn't have it. What happens is it gets to a local level and we have problems. In Mississippi, MDMR just bought a \$300,000 boat, because they don't believe the data on red snapper from the national fisheries is accurate, so they are going to collect their own data with a \$300,000 boat. That's foolish. We're talking of building an aquarium. That's not going to help the Gulf rebuild. We're overfishing. We need wetlands, and we're supporting development that overruns "low-quality wetlands" and there's no such thing as low-quality wetlands, not if you live along the coast. We have lost all our institutional knowledge. There's no fisheries scientists that will stand up and say 'this is not the right thing'. It's all political. We're talking about hatcheries to raise oysters in Mississippi. Oysters are pretty easy. A hatchery's not necessarily a bad idea, but it's not going to be a panacea. We've had worse water quality issues this year than I can ever remember--red tides, low DO. Three weeks ago, I was walking a quarter-mile stretch of beach and I counted 120 dead Gulf toadfish (oyster fish). We don't know why. Thank you.

I'm tired of seeing fish dying all the time. I'm a bottom trawler and I'm sad that we're here today and this is terrible. I hope you all do something to restore oyster reef. Been fishing all my life. Since the oil spill, my industry and my business has suffered tremendously. If you think BP has paid me for my loss, they haven't. The oyster industry; I've been doing it for 25 years. I'm tired of Jamie Miller telling me about water quality. I'm watching fish die all around me. It's out there. I'm a bottom trawler and it's sad that we're here today and this is terrible. I hope you all do something with the money such as restore oyster reefs instead of letting them build buildings, baseball parks. My industry needs it. I've oystered 80 days in six years. I own a \$200,000 boat with \$25,000 a year for upkeep and you're about to drop me out of business with this BP oil spill. If you all think BP has taken care of us, you are wrong. My health issues; I'm tremendously sick. 108 days in the hospital and 52 visits to the emergency room with vomiting, with benzene, etc. in my blood system, kidneys and liver are swollen. They didn't care. They sprayed me with dispersants. All over me. With the red, white, blue planes. My industry is really suffering. I don't have 15 years for you to fix my problems, so I hope you all do it quickly. I'm tired of arguing with DMR, Jamie Miller, Richard Gollott, Phil Bryant. He says we're farmers of the sea, well he's a liar. I'm a farmer and they ain't done nothing for me. They want to put sewers in Jackson, MS with our RESTORE money. We need it out there, where it really needs to be. Not only my family, but the Vietnamese, the white, black people; we're all suffering. If you all do something, do something with those oysters because it's a terrible situation.

I want to reiterate several previous comments, particularly the last three comments. There are only several fishermen here and I applaud them for being here. Many fishermen are not here because they are out shrimping and cannot be here. I recently requested the comment period be extended two weeks. I cannot reiterate the importance of it. We need more fishermen to get this information to review the updated draft plan and to submit the comments in time. Particularly since the Council took the liberty to translate the fact sheets and the Updated Draft Plan. We would appreciate it from us. I want to comment on the draft plan. We think three years is too long to wait for the next funded priorities list, particularly for the public engagement process. We think that two years is much more doable. I understand why you are proposing three years for interest to accrue but I think two years is much better. We also recommend an external independent panel of multidisciplinary scientists (natural, social scientists) and representative members of the public to review proposed projects. We think there should be greater transparency. To us, the best available science means that we have not only external and independent scientists but a holistic external process in place to assess pros and cons of projects. For example, the 1-page fact sheets recently given to us lacked sufficient information. We need

uniform monitoring metrics, accessible data along with pros and cons.

### **Correspondence Text**

The National Wildlife Federation commends the Council and staff for a strong draft blueprint to guide the Council's next chapter. We're pleased with Council's focus on revising submission guidelines to provide clearer guidance to those crafting and reviewing proposals and how these proposals can link back to RESTORE Act priority criteria. The council has made great strides in public engagement to provide the public another opportunity to review these guidelines. We're pleased the Council has responded to many stakeholders from across the Gulf region in lifting up coordination of all phases across the restoration process (workshops and meetings and hope the Council will share tangible outcomes from those meetings). I would like to commend Alabama and Mississippi for their presence at several Draft Plan Update meetings (e.g., Mr. Burch and Mr. Wyatt). We think that's a great step forward in demonstrating the cooperative opportunities around these plans. We appreciate the Council's dedication to large-scale projects, as they're key to sustaining the long-term health and sustainability of the Gulf, including vital estuaries like the Mississippi Sound that span several states. As it references the Council's interest in exploring financial approaches for large-scale projects, we recommend consider coordinate timing future FPL opportunities with other funding streams, like NRDA and NFWF. And look to other outside funding sources, such as USDA's announcement last week for private

Gulf Coast landowners. [Quotes draft plan update: "The task of restoring the Gulf environment is a multi-generational undertaking"]. As we recognize that we are in a marathon, not a sprint, this draft plan really allows the Council to look at long-term transformative restoration opportunities for multiple generations. The National Wildlife Federation looks forward to helping support the Council as it finalizes this plan and moves into implementation. Thank you.

Good evening, thank you. This is a once in a lifetime opportunity. The Initial Comprehensive Plan didn't capture that tone, however this update does capture that and we thank you for that. There are things we are happy about including the proposed update to submission guidelines, the commitment to large-scale projects, conservation financing and leveraging, as well as the commitment to science-based decision making and using external experts and a panel approach. We're very pleased with the coordination and leveraging commitment. We think project sequencing and synergies is important as well. Because we're in Texas, we are happy about the meaningful addition of water quantity as it is an ecological stressor on our coast. Thank you to Commissioner Baker on your commitment to RESTORE. And thank you to Commissioner Baker for going to New Orleans and attending a meeting outside of Texas. We ask you Justin, that we have an opportunity to speak to other council members from other states as well in the future and encourage other state Council Members to attend meetings in other states.

We are glad you're here and that the Comprehensive Plan is being revised. We have a saying that we never paddle faster than the weakest paddler. So when you implement this plan you need to pull the weakest paddlers along with you. However, I'm heartbroken and disappointed that Bayou Greenways got approved prior to projects supporting barrier islands in this watershed. Small barrier island communities (such as this one) need to come forward with you. We are the frontlines of defense against oil spills and hurricanes, we are the key to ecosystem integrity, we are the doorway to the coast for ~\$6 million visitors. Unless you help support small barrier island communities to coordinate and submit their projects and then fund these projects you'll never achieve coastal resiliency. And please commit 3% of all your buckets of funding to environmental education programs, including ocean literacy, and place-based education. And keep in mind there are also species in the Gulf that can't speak for themselves. Marine mammal species in the Gulf are amazing. Many of them listed in NRDAR were damaged greatly. You should develop a sperm whale marine sanctuary that will benefit not only sperm whales, but also other species of marine mammals and other non-mammal species in the Gulf. Invest dollars in the marine environments.

Your reflecting got me reflecting. I was at the first Council session in Texas and talked to Justin and others to please consider what young adults can do to help provide solutions towards resiliency in the Gulf. Thank you for listening. Since that time I was able to first share my input with Council members, over the past 3 years I have seen partners all over the Houston-Galveston area start coordinating and sharing their ideas. These people are not forgetting that young people should be involved in restoration. My high school students will be involved in the restoration you all are doing now in the near future. Some of them will likely work on the new electronic rigs in the Gulf. I feel really good about what is happening. I tell folks, let's not forget our young people. I am pleased to see people are not forgetting the young people, but instead people are acting and including young people. YAY for the Gulf Coast Conservation Corps project! I didn't want this night to go by without saying how much I appreciate you, all of you, and all young people have to offer. This is their Gulf, and they care about it.

I am on the board of the Galveston Bay Foundation and associated with Galveston Bay Keeper, but I am speaking for myself as a private citizen. I would like to support what Jordan said and what Karla said. What Karla said is we have unique resources in the Gulf. The first EIS I ever read was about the Gulf in the 70's written by NOAA when they were going to put an ocean incineration site in the Gulf. They said there were no endangered species in the Gulf. No whales, no sea turtles, etc. After many years working with sea turtles, we all know that this is not true. During Exxon Valdez I was asked to go help, because I recognized what oil and oil sprayed with dispersant looks like. During the deepwater horizon oil spill, I went out on a flyover flight from the Sabine to the San Bernard River. I took pictures. We saw Texas had oil that had been hit with dispersants. We saw it and so we know it went at least as far as the San Bernard. We know Texas was hit. But we know LA,MS, and AL were hit harder. However, oil that's been hit with dispersants breaks up, fine particles are dispersed all the way throughout the entire water column affecting all living organisms in addition to the oil that goes straight to the bottom of the ocean. So please consider an offshore marine sanctuary. Statistics since Exxon Valdez show species have dropped dramatically and will not ever fully recover. We will face the same thing in the Gulf.

Thanks to Commissioner Baker for the reminder at the beginning of this meeting that people lost their lives and that's so important to remember. To that point, one thing that's effective is working at the local level to transform processes that lead to better stewardship. Please look at projects to include local, county, and regional projects in how they can improve watershed management and the data that can help support them. Please invest in our working waterfronts so they can provide a source of income and economic development (ports, marinas, tourism, and attracting people to the coast to invest in economic development). Looking long-term to build on environmental resources, then to build the economic resources from that, to continue to restore the Gulf.

I would like to add these written comments to the verbal comments I provided at the public meeting held Sept. 26, 2016 at the USM campus in Long Beach.

The biggest concern I have is that some how we can find a way to hire and provide money to the consultants on these types of projects, but we can't find a way to help out the subsistence commercial fishermen.

Oversight and coordination with all relevant local, state and federal agencies for these types of projects is critical to the success of RESTORE. There must be some assurance that when the funds get to the state agencies, there is some type of oversight by the funders. For example, if I see something with a project that I have concerns with, who do I call? I want to make sure the funds are used correctly.

There is a critical need for an educational component to RESTORE so that children understand why it is important to protect and conserve our natural resources. Our local agencies and leaders are ill-equipped to comprehend the need and grasp the complexities of these projects. There is a

lack of understanding what the legal limits are and what they are required to enforce.

There is no sense of urgency to get the projects constructed.

It makes no sense to spend millions of dollars to restore wetlands while at the same time local authorities and developers are proposing and obtaining permits to fill wetlands. There is no overarching coordination and enforcement of the plan to conserve and preserve our coastal wetlands.

Water quality issues in the MS Sound, in my opinion, are bad. This summer we have had red tide, low dissolved oxygen, dead oysters, "beach advisories" which should be called what they are... beach closures. As long as we allow stormwater runoff to enter our waterways, solving these water quality issues with patchwork projects will not solve the problem. We need a comprehensive educational program to educate the public.. they need to realize that what they put in their ditches and will end up in the Sound. I have seen people pour paint into the ditches. Chemicals for killing ants, fertilizer to make yards green, all of this ends up in the Sound, reducing the quality of our water. We should spend some of these RESTORE funds on a long-term grass roots public education program. This should not be a science-based program to study.. this should a public engagement program.

Finally, you must admit that the number of private citizens involved in this process is almost non-existent. This is reflected in the low number of attendees other than consultants, NGOs, state and federal agencies, etc. at these meetings. The public needs to be included in this process. More and different methods of public notice need to be tried to get more public involvement. Have you considered creating a citizens' advisory group to help provide public input into projects before they are approved.

thank you for your time and consideration.

Re: Draft Comprehensive Plan Update by the Gulf Coast Ecosystem Restoration Council, 2016

The City of Orange on behalf of the Orange Interlocal Group appreciates the opportunity to submit comments as part of the RESTORE Council's continuing effort to "Restore the Gulf" in the aftermath of the Deepwater Horizon environmental disaster and human tragedy.

The Orange Interlocal Group is made up of Orange County cities, water supply companies, the Sabine River Authority and the Port of Orange that have all been collaborating to present the BP restoration process with clear and impactful projects that can help "RESTORE the Gulf."

As for our comment on the proposed Draft Comprehensive Plan Update, the Interlocal Group agrees with the Council's intention to continue in the same policy direction stemming from the original restoration Task Force's vision. Consistency in goals and objectives on your part helps us make project recommendation to the Texas RESTORE Council Trustee using the same policy aims.

And we agree that adopting a Ten Year Implementation Plan makes sense and the Interlocal Group supports the built in opportunities to adjust investment priorities as you go if conditions warrant a modification of the Plan.

The Ten Year Plan provision should help the Council underscore the Plan's recommendation to prioritize large-scale projects and to use best available science to guide the Council.

The Orange Interlocal Group also supports the Council's decision to integrate your project investments in the context of prior local, state and federal plans. In particular, the Orange Interlocal Group urges the Council to prioritize water quality and water quantity goals and objectives.

Specifically, the Group is encouraged by the Council's view that:

"Water quality in the coastal and marine environments is degraded by upstream land uses (including both point and non-point discharges of pollutants) and hydrologic alterations spanning multiple states and involving the watersheds of large and small river systems alike."

Lastly, the Orange Interlocal Group wishes to associate our support for the process the Council is undertaking by quoting the Plan's overview statement which we feel does a good job at including human and economic dimensions of restoring the Gulf as Congress intended in the RESTORE Act"

"The Gulf Coast ecosystem is vital to our Nation and our economy, providing valuable energy resources, abundant seafood, extraordinary beaches and recreational activities, and a rich cultural heritage. Its waters and coasts are home to one of the most diverse environments in the world-including over 15,000 species of sea life. More than 22 million Americans live in Gulf coastal counties and parishes, working in crucial U.S. industries like commercial seafood,

recreational fishing, tourism, and oil and gas production. The region also boasts of a significant shipping industry including 10 of America's 15 largest ports accounting for nearly a trillion dollars in trade each year. Much of this value is built upon the Gulf Coast environment and the many benefits it provides."

Thank you again for your efforts and this opportunity to comment on the Plan.

Re: Draft Comprehensive Plan Update by the Gulf Coast Ecosystem Restoration Council, 2016

Chambers County Commissioners Court appreciates the opportunity to submit comments as part of the RESTORE Council's continuing effort to "Restore the Gulf" in the aftermath of the Deepwater Horizon environmental disaster and human tragedy.

The County agrees with the Council's intention to continue in the same policy direction stemming from the original restoration Task Force's vision. Consistency in goals and objectives on your part helps us make project recommendation to the Texas RESTORE Council Trustee

using the same policy aims.

And we agree that adopting a Ten Year Implementation Plan makes sense and the County supports the built in opportunities to adjust investment priorities as you go if conditions warrant a modification of the Plan.

The Ten Year Plan provision should help the Council underscore the plan's recommendation to prioritize large-scale projects and to use best available science to guide the Council.

Chambers County also supports the Council's decision to integrate your project investments in the context of prior local, state and federal plans. In the aftermath of Hurricane Ike, Chambers County has developed good working relationship with state and federal agencies in the county. Those relationships and our mutual awareness of each other's goals are invaluable regarding BP restoration.

Lastly, Chambers County wishes to associate our support for the process the Council is undertaking by quoting the Plan's overview statement which we feel does a good job at including human and economic dimensions of restoring the Gulf as Congress intended in the RESTORE Act"

"The Gulf Coast ecosystem is vital to our Nation and our economy, providing valuable energy resources, abundant seafood, extraordinary beaches and recreational activities, and a rich cultural heritage. Its waters and coasts are home to one of the most diverse environments in the world-including over 15,000 species of sea life. More than 22 million Americans live in Gulf coastal counties and parishes, working in crucial U.S. industries like commercial seafood, recreational fishing, tourism, and oil and gas production. The region also boasts of a significant shipping industry including 10 of America's 15 largest ports accounting for nearly a trillion dollars in trade each year. Much of this value is built upon the Gulf Coast environment and the many benefits it provides."

Thank you again for your efforts and this opportunity to comment on the Plan.

Re: Draft Comprehensive Plan Update by the Gulf Coast Ecosystem Restoration Council, 2016

The Orange County Navigation and Port District is one of the Gateways to Texas and we appreciate the opportunity to submit comments as part of the RESTORE Council's continuing effort to "Restore the Gulf" in the aftermath of the Deepwater Horizon environmental disaster and human tragedy.

The Port of Orange is a member of the Orange Interlocal Group, made up of Orange County cities, water supply companies, the Sabine River Authority and the Port of Orange. We have all been collaborating to present the BP restoration process with clear and impactful projects that can help "RESTORE the Gulf" in our region.

As for the Port's comment on the proposed Draft Comprehensive Plan Update, we agree with the Council's intention to continue in the same policy direction stemming from the original restoration Task Force's vision. Consistency in goals and objectives on your part helps us make project recommendation to the Texas RESTORE Council Trustee using the same policy aims.

And we agree that adopting a Ten Year Implementation Plan makes sense given the staged funding from the BP settlements, and the Port supports the built in opportunities to adjust investment priorities as you go if conditions warrant a modification of the Plan.

The Ten Year Implementation Plan provision should help the Council underscore the Comprehensive Plan's recommendation to prioritize large-scale projects and to use best available science to guide the Council.

The Port of Orange is specifically encouraged by the Council's view that Ports are a focal point in your overview quoted below:

"The Gulf Coast ecosystem is vital to our Nation and our economy, providing valuable energy resources, abundant seafood, extraordinary beaches and recreational activities, and a rich cultural heritage. Its waters and coasts are home to one of the most diverse environments in the world-including over 15,000 species of sea life. More than 22 million Americans live in Gulf coastal counties and parishes, working in crucial U.S. industries like commercial seafood, recreational fishing, tourism, and oil and gas production. The region also boasts of a significant shipping industry including 10 of America's 15 largest ports accounting for nearly a trillion dollars in trade each year. Much of this value is built upon the Gulf Coast environment and the many benefits it provides."

The Port of Orange also agrees with the Council's adherence to the Executive Order that gave direction to BP restoration:

"All activities, projects, methods, and procedures appropriate to enhance the health and

resilience of the Gulf Coast ecosystem, as measured in terms of the physical, biological, or chemical properties of the ecosystem, or the services it provides, and to strengthen its ability to support the diverse economies, communities, and cultures of the region. It includes activity that initiates or accelerates the recovery of an ecosystem with respect to its health, integrity, and sustainability. It also includes protecting and conserving ecosystems so they can continue to reduce impacts from tropical storms and other disasters, support robust economies, and assist in mitigating and adapting to the impacts of climate change (per Executive Order 13554) "

Thank you again for your efforts and this opportunity to comment on the Plan.

### **Correspondence Text**

The Atchafalaya River is one of Americas greatest natural resources. The Corps of Engineers has documented 8,986 acres created along the Atchafalaya River and Atchafalaya Bay from 1976-2015 through the beneficial use of dredge material. Islands are created with nutrient rich sediment where vegetation grows naturally and birds and wildlife claim the area as their habitats almost immediately.

The Atchafalaya and Wax Lake Deltas are a part of a 137,695-acre area known as the Atchafalaya Delta Wildlife Management Area. Open water in the Atchafalaya Bay makes up most of the area. The two deltas were formed from the accretion of sediments from the Atchafalaya River and from the deposition of dredge material by the Corps of Engineers. Activities in the Delta include hunting, fur trapping, commercial and recreational fishing, alligator harvesting and birdwatching. There are 2 campgrounds in the area available to boaters.

Wetlands creation, like we are seeing on the Atchafalaya on a very large scale, trap carbon, support large strands of wetlands vegetation, provide large areas of coastal and estuarine habitats for fisheries and organisms, improve water quality and increase climate change

resilience, according to a number of reports.

The Atchafalaya River receives 30% of the flow of the Mississippi River, along with its sediments, through the Old River Control Structure. The Atchafalaya River used to be one of the deepest rivers in the world with over 100 of water depth. Now a floodway, the river continues to fill in with sediment, many times providing less than 20 depth. And, due to Corps of Engineers standards, much of the material in Berwick Bay Harbor (the segment of the Atchafalaya River between Berwick and Morgan City) is not used beneficially. Corps records indicate that from 1996 through 2014, of the 28,551,308 cubic yards of sediment removed from Berwick Bay, 24,810,989 cubic yards went to open disposal depending on the current to carry it down the Atchafalaya River.

Therefore, due to restricted flow, flood waters remain in unprotected areas of Berwick and Morgan City (outside of floodwall) for a longer period of time allowing more opportunity for pollutants to be carried down river.

The Atchafalaya Delta has helped to guard the communities of Morgan City and Berwick from the effects of powerful storms. Morgan City and Berwick are located in St. Mary Parish, LA about 18 miles from the mouth of the Atchafalaya River within the Morgan City Harbor & Terminal District (Port of Morgan City) territorial boundaries. The Port of Morgan City terminal facility is located at the confluence of the Atchafalaya River and the Gulf Intracoastal Waterway. A BNSF spur serviced by Louisiana and Delta Railroad Connects the port to the U. S. rail network. Future I-49 runs through the port district. Our area has been used as safe harbor by fishermen, industry, and even U. S. Coast Guard vessels from other states during hurricanes.

While no one looks at the sediment in the Atchafalaya River for marsh and wetlands creation projects since we are not losing land, diversions off of the Atchafalaya River are being planned. We have not been provided any data to prove that diverting water will not cause more sediment buildup in the Atchafalaya River and Bayou Chene, two major navigation routes that serve our community.

In a recent Fox 8 News interview, Chris Allen, CPRA Project Manager for a beach restoration project in Plaquemines Parish, referring to the Mississippi River, stated that, the river provides

better sand than the offshore material used on beaches in the past. The Atchafalaya River carries those same sediments. We have the ability to create fish, wildlife and coastal habitats, promote community resilience by creating natural buffers from storms, and to allow flood waters to flow out to the Gulf more quickly through dedicated dredging of the Atchafalaya River and increased beneficial use of sediment.

Our request to the Restore Council is that as you evaluate the projects submitted to you for funding that you especially take into consideration those innovative projects that will utilize dredging sediment from the Atchafalaya River in order to promote increased beneficial use.

Sincerely,

Raymond Mac Wade  
Executive Director, Port of Morgan City

Gulf Coast Ecosystem Restoration Council  
500 Poydras Street  
Suite 1117  
New Orleans, LA 70130

October 7th, 2016

Dear Restoration Council Members,

On behalf of Greater New Orleans, Inc. (GNO, Inc.'s) Coalition for Coastal Resilience and Economy (CCRE), I'm contacting you today to express our support and appreciation of the Council's recent Comprehensive Plan. Long term restoration efforts are vital for not only the environment of Southeast Louisiana, but the economy as well: this Plan ensures a more balanced and holistic approach to such efforts moving forward.

As a non-partisan, business-led advocacy group, CCRE is comprised of business leaders from various industries and backgrounds across Southeast Louisiana. Staffed and organized by GNO, Inc.-the economic development alliance for the 10-parish Greater New Orleans region-CCRE members have no vested financial interest in coastal restoration (i.e. do not represent firms vying for contracts), but understand the existential crisis coastal land-loss brings to our economic stability. As such, ensuring there are safeguards and benchmarks in place to advance coastal restoration is of primary concern to our Coalition.

To that end, CCRE and GNO, Inc. would echo the comments we submitted alongside our partners in the conservation community, specifically calling the Council's attention to two areas of primary importance for the Southeast Louisiana business community:

1. Attention to Large Scale Projects and Alternative Financing Approaches: In Louisiana, the scale and enormity of our coastal crises will not be solved by small project implementation. We are at a stage where only significant investments in catalytic undertakings will begin to move the needle on coastal land-loss, which affects the entire Gulf of Mexico. In October 2015, CCRE members met personally with Department of Commerce Secretary Penny Pritzker, to emphasize this message of large-scale project prioritization. We are pleased to see this focus reflected in this Comprehensive Plan. Additionally, CCRE has been engaging in discussions with some of the Council to determine avenues for ensuring projects are financially viable: we stand ready to commit our network's professional expertise and capacity to this issue in support of the Council's priorities.

2. Consideration of Economic Enhancement: As an economic development and business community voice for coastal restoration, GNO, Inc. and CCRE commend the Council's consideration of economic enhancement. Via extensive research and data collection, GNO, Inc. has quantified the extraordinary industry, job and GDP growth that coastal restoration will bring to our region-if funds are invested in a dedicated and efficient manner. Moving forward, we strongly encourage the Council to view economic opportunities through the strict lens of environmental management and enhancement.

Thank you for your continued leadership on this issue and ongoing vigilance for Louisiana's coast. Your efforts are not only vital for our environment, but for our economy and workforce as

well. Please don't hesitate to enlist our support moving forward.

Sincerely,

Michael Hecht Marty Mayer (CCRE Chairman)  
President and CEO President and CEO of Stirling Properties

Jefferson Parish is home to some of the most picturesque and important landscape of our states coastal property. The loss of Louisiana's rich coastal wetlands has a dramatic impact on energy, navigation and fishery industries. The Jefferson Chamber of Commerce has long supported coastal restoration and organizations that let the science not politics dictate coastal funding for Jefferson Parish and the state. Our chamber is also in support of moving forward with large-scale restoration projects, which are an essential central part of the state's Coastal Master Plan. We ask that the council leverage project benefits by considering synergies among programs and projects. We also encourage the council show leadership in coordination among different agencies involved in funding restoration.

October 7, 2016

Gulf Coast Ecosystem Restoration Council  
Hale Boggs Federal Building  
500 Poydras Street, Suite 1117  
New Orleans, LA 70130

Re: Gulf Coast Ecosystem Restoration Council, Draft 2016 Comprehensive Plan Update -  
Comments

On behalf of the 200 member companies, individuals and agencies that comprise the Gulf Intracoastal Canal Association (GICA), we would like to commend the Gulf Coast Ecosystem Restoration Council for its progress in your draft Comprehensive Plan update, while also offering our perspective on its most critical components.

GICA is a not-for-profit trade association that works to facilitate commerce through ensuring safe, reliable and efficient Gulf Coast waterways. We are the leading business voice for inland navigation on the Gulf Coast. As you know, the Gulf Coast Intracoastal Canal is host to shipments of petroleum, chemicals, grain and other products that are critically needed to fuel the economic engines of the Gulf States, the region and the nation.

Our members rely heavily on the Mississippi River, but also on its delta because our inland waterway fleet is not designed for or able to effectively function for the possible eventuality that our disappearing coast could turn the inland waterways into open water. GICA supports large-scale, science-based Mississippi River Delta restoration because our members understand that our livelihood and the economic benefits we provide to the region and nation depend directly on successful restoration of the Louisiana coast.

Effectively deploying the Deepwater Horizon funding is a once-in-a-lifetime opportunity, and we need to get it right. We appreciate the Council's adherence to the RESTORE Act's prioritization of large-scale projects. Large-scale projects like diversions and others in the Louisiana Coastal Master Plan are essential to ensuring the long-term sustainability of the entire Gulf Coast, and the economic viability of businesses that depend on a healthy Gulf ecosystem. We also appreciate that the Council is taking a comprehensive view of restoration and is looking for ways to maximize project benefits by finding synergies among current and future projects.

We ask the Council to act with urgency in improving the process for submitting project proposals for potential funding and in considering how projects in future Funded Priority Lists can be strategically timed and coordinated with other restoration funding streams. We support the Council's plans to develop an interagency panel to identify synergies between projects, and we urge that you make this process science-based, transparent and inclusive of external experts. We also hope that you will develop rigorous timelines for project assessment, planning and coordination. Louisiana is currently losing land at a faster rate than anywhere else in the world, so we need plans and processes that reflect this urgency.

GICA supports common-sense methods to preserve, protect, enhance and restore coastal wetlands while maintaining our vital inland waterway. Our members are deeply concerned about coastal land loss and will be closely watching the Council's work in the hopes that it will be large-scale, highly leveraged and well-timed to meet the reality of the pressing threat to our economic interests. Thank you for your continuing work to advance coastal restoration.

Sincerely,

/s/

Jim Stark  
President

Dear Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward eaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less. Please take full advantage of this opportunity to have a long lasting positive effect on the entire Gulf ecosystem. Thanks

October 7, 2016

Dear RESTORE Council Members and Staff:

Thank you for the opportunity to comment on the 2016 Update to the Comprehensive Plan that helps guide Council-Selected and Spill Impact Components of the RESTORE funding stream. We appreciate not only your time and effort devoted to updating the Comprehensive Plan, but the immense amount of thought and communication involved in updating the plan with five state and six federal parties involved. This Update is a significant step in the right direction for help in providing guidance in an environment where the physical, environmental, sociological and political components are diverse, complex and dynamic with significant unknowns. Having this document as a guide and framework helps ensure a more successful outcome.

We appreciate the Council's continued sharing of background information on its website and through its members in a timely manner.

We are delighted the Council has further defined its proposal development process and has considered mechanisms to include public input as its members develop and refine proposals for projects and programs. Though seeking collaborative input can be a time-consuming process, it usually results in a stronger, more successful product.

We applaud your efforts to coordinate with other funding sources and efforts to maximize effectiveness and efficiency. The plans for the RESTORE Council to communicate and coordinate with Natural Resource Damage Assessment (NRDA), National Fish and Wildlife Foundation (NFWF) and other potential funding sources are greatly appreciated. We strongly encourage leveraging of all available Deepwater Horizon funds, but we do caution decision makers not use the availability of any of the funding streams as an opportunity to over-leverage existing funds that other conservation and restoration efforts depend upon.

We are pleased to see that the Council recognizes that this process is going to be a multi-generational effort with impacts on several future generations. We ask that consideration be given to communicating with our next generation of leaders to involve them in this unprecedented opportunity sooner rather than later. Most of the children that are in kindergarten today will be in the workforce before the last of the Deepwater Horizon-related funds are spent. Reaching out through the Centers of Excellence, numerous Science, Technology, Engineering and Mathematics (STEM) programs and other education avenues about current and planned efforts may play huge dividends in the coming decades.

While we trust that the Council understands the regulatory limitations of project selection for future Funded Priorities List (FPL), we applaud the Council for its forward thinking to "more fully consider all five goals," which includes addressing the Gulf economy, in future FLPs. We recognize and value the inherent benefits of ecosystem restoration on local and regional economies and support the Council's efforts to track those ecosystem benefits. While the Council is statutorily limited in criteria for project selection under the Council Selected component, we believe that there is nothing that keeps the Council from encouraging its applicants to actively structure ecosystem restoration proposals in ways that positively impact the Gulf economy at higher levels, whether that be through local sourcing, enhancing longer term sustainability and resiliency or some other mechanism. This is especially true when Council Selected components can be leveraged with other funding streams to have a long-term, positive economic impact in our local Gulf communities. The more hard goods and expertise that can be locally sourced, the longer the Gulf recovery funding will circulate in the local Gulf

communities.

We strongly support the Council's decision to pursue synergistic, holistic, large-scale, cross-boundary projects and programs that positively impact ecosystem and economic restoration in significant ways.

We are pleased with the decision to strategically develop successive FPLs periodically rather than annually. That process is economically and administratively sensible and should result in restoration efforts that are significantly more effective and efficient. Funding larger projects at one time is much more efficient and effective than funding them through a piecemeal process.

Again, we thank you for your continued efforts to be good stewards of the Deepwater Horizon-related funds you have been entrusted with on the public's behalf. We look forward to continuing to support you in your efforts to improve the Gulf of Mexico.

Sincerely,

James L. Cummins  
Executive Director

Canal Barge Company, Inc. appreciates this opportunity to provide comments to the Gulf Coast Ecosystem Restoration Council's draft update to its Comprehensive Plan. Canal Barge is a family owned business and a regional and national leader in marine transportation, terminal services and vessel management services along the nation's inland waterways and the Gulf of Mexico.

Our company has been a strong supporter of coastal restoration in Louisiana, because we understand that the economic success of our business and our customers-across the entire Gulf Coast region-depends on successful and urgent coastal restoration here in Louisiana where the risk and opportunity are the highest. Without meaningful action to restore the coast, the Gulf Coast Intracoastal Waterway-and the local, regional and national economies that depend on it-are all at great risk.

As the Gulf Council proceeds with its planning and deployment of funds from the Deepwater Horizon spill, we urge you to implement the Plan's coordination commitments with urgency and transparency among the different agencies and funding streams involved in coastal restoration. We agree that is important to prioritize the landscape scale projects that will provide the greatest benefit in restoring the Gulf Coast, and considering how the different projects fit together and build on each other to maximize lasting impacts is an important part of that analysis. While the funding provided by the Deepwater Horizon spill presents an historic opportunity to rebuild our coast, it is not enough. So selecting and sequencing projects based on critical needs and leveraging among the projects that are funded is absolutely essential.

We also hope that your planned interagency coordination is tied to specific timelines and concrete steps that reflect the urgency of the nationally significant land loss crisis in Louisiana, where we are losing a football field of wetlands every 38 minutes.

Canal Barge appreciates the work of the Council in expediting coastal restoration projects under a plan that will do the most good for dollars available. We trust that the Council will continue its focus on making your plans and projects science-based and informed by stakeholders. Thank you for your work and renewed push to get stakeholder input.

Spencer Murphy  
General Counsel  
Vice President - Risk Management  
Canal Barge Company, Inc.

October 5th, 2016

Justin Ehrenwerth  
Executive Director, Gulf Coast Ecosystem Restoration Council  
c/o Hale Boggs  
Federal Building, 500 Poydras Street, Suite 1117  
New Orleans, LA 70130

RE: Comments on Gulf Coast Ecosystem Restoration Council Comprehensive Plan

Dear Mr. Ehrenwerth,

As the Gulf Coast Ecosystem Restoration Council completes its revisions of its Comprehensive Plan, Oxfam America offers these comments to ensure the needs of the region's most vulnerable residents are reflected in this once-in-a-lifetime opportunity to revitalize America's Gulf Coast.

These comments build on a series of recommendations to the Council from Oxfam and numerous diverse organizations in Alabama, Florida, Louisiana, Mississippi and Texas urging the Council to ensure Gulf restoration includes efforts to meet the needs of low income and minority workers and communities who disproportionately rely on the health of these ecosystems.

The Council's Plan represents a critical step toward repairing some of our nation's most valuable natural resources, enhancing the resilience of our communities, and fostering an emerging restoration economy. The Council has continued to display great leadership in moving towards an integrated vision to leverage investments under the RESTORE Act and beyond towards these goals.

People, communities and cultures are an important part of the Gulf Coast ecosystem, and they face historic challenges: extreme weather, loss of livelihoods, rising poverty, threats to well-being and way of life, hindered economic mobility, and limited access to policy-makers. The 2010 oil spill amplified each one of these challenges. The restoration of the natural resources, damaged not just by the oil spill but by decades of degradation, is essential for protection of the region's economy, communities and way of life.

While tackling our greatest ecological challenges, we should not lose sight of the linked socio-economic impacts and the inequality of how those impacts are experienced by our most vulnerable communities. These include recommendations to the Council that build on the Plan's criteria, objectives and processes to meet the needs of the Gulf's most vulnerable populations, including:

1. Ensure project assessment adequately evaluate and prioritize impact on vulnerable communities, community resilience and culture.
2. Ensure revisions to project assessments do not negate goals to support workforce development.
3. Establish practices to increase inclusion of the most vulnerable in project development and assessment.

We thank the Council for the opportunity to comment on the revised draft and for its thoughtful

consideration of this submission. We look forward to continued engagement with the Council on these issues.

If you have any additional questions, please feel free to contact Jeffrey Buchanan of Oxfam America by email at [jbuchanan@oxfamamerica.org](mailto:jbuchanan@oxfamamerica.org) or by phone at (202) 471-3055.

Sincerely,

Jeffrey Buchanan  
Senior Domestic Policy Advisor  
Oxfam America  
Washington, DC

## RECOMMENDATIONS

1) Ensure project assessment adequately evaluate and prioritize impact on vulnerable communities, community resilience and culture.

The Gulf Coast Ecosystem Restoration Council ("Council") in the Draft Comprehensive Plan ("Plan") defines "ecosystem restoration" as projects that enhance the health and resilience of the Gulf Coast ecosystem, measured in terms of both the "physical, biological, or chemical properties of the ecosystem" and the ecosystem services that "...strengthen its ability to support the diverse economies, communities, and cultures of the region." Under project criteria laid out in the Comprehensive Plan, the impacts on communities and cultures, which are often more challenging to project and measure, are likely to not receive appropriate focus in project plans and use of best available science in decision making and evaluation which tend to put more focus on quantitative natural science outcomes, where project specific data is often more readily available, over social science where data on impact is more challenging to model. For instance, a project restoring 100 acres of wetlands unlikely to provide flood or surge protection to

communities would be evaluated as equal to a project restoring 100 acres of wetlands that could provide natural protection and fisheries habitat to a nearby high-risk, fisheries-dependent coastal community. The Council should develop processes that do not limit its ability to select projects which best meet its own full definition of success. Advancing the Plan's goal to Enhance Community Resilience without evaluating community resiliency impacts will be particularly difficult.

Social sciences show communities with high rates of poverty, unemployment, racial and ethnic minority and/or Native American status, and low English proficiency are more socially vulnerable to environmental hazards and have a more difficult time preparing for, responding to, and recovering from disasters. A number of agencies have examined tools like the Social Vulnerability Index to identify this inequality of risk.[1] Federal environmental justice laws already require environmental projects to be evaluated for impacts on such populations.[2] In particular the Council should take steps to ensure projects are reviewed for their impact on vulnerable population and prioritize projects that reduce risks for disproportionately impacted, socially vulnerable populations, going above the bare minimum approach applied to date in the NEPA process.

2) Ensure revisions to project assessments do not negate goals to support workforce development.

The Plan supports "ecosystem restoration that builds local workforce capacity" as a goal and "training and professional development" as an activity within the objective Promoting Natural Resource Stewardship and Environmental Education. The Council should be congratulated for its commitment to this goal, seen in its investment in a regional Gulf Conservation Corps project to promote job training preparing local workers for restoration work, leveraging additional restoration investments to ensure local communities reap the most from investments in restoring the Gulf. We hope the Council will continue to prioritize investments in job training connected to its restoration work going forward.

Studies show ecosystem restoration can create between 17 and 36 jobs for every million dollars invested, with a significant portion of those being employment opportunities directly involved on the projects. While some of the science and engineering jobs in restoration require many years of schooling, many involve shorter vocational training- -such as welders, pipefitters, deck hands, boat captains, heavy equipment operators, geotechnical, environmental and land surveyor

technicians.[3] These jobs provide opportunities to help craft new pathways out of poverty for local residents with the right kinds of workforce development projects and systems.

Recognizing the potential unmet labor demand of future large-scale ecosystem projects, together 120 Gulf Coast companies (many already involved in ecosystem restoration) after the passing of the legislation urged each of the five Gulf State Governors to use RESTORE Act funds for worker training to prepare low income, disadvantaged and displaced workers for ecosystem restoration jobs to meet their needs for skilled labor and to remain competitive.[4] A better skilled restoration workforce can help the Council, project sponsors and their contractors to achieve its goals to Restore and Conserve Habitat, Restore Water Quality, Replenish and Protect Living Coastal and Marine Resources, and Enhance Community Resilience on budget and on time. Congress expressed its intent that the Council should include "ecosystem restoration related workforce development" in the Plan during the passage of the RESTORE Act.[5] Since its founding, public forums surrounding the work of the Gulf Coast Ecosystem Restoration Council have continually shown strong public support for policy to prepare workers to access the jobs created by RESTORE Act funded projects. More than 100 community organizations across the region also urged the Council to include this objective in the Plan in a memo.[6]

Modest investments in programmatic approaches to workforce development, such as the Gulf Conservation Corps, even those which leverage the millions of dollars in restoration across the region, may face greater challenges scoring as well as more purely environmental approaches to restoration in the future under the revised Comprehensive Plan, despite the added value to working families and the community they provide. The Council should work to refine the approach to ensure these community benefits are not undervalued in the face of other natural systems related outcomes so that workforce development can still be a part of future Council investments building on its initial goals. Pursuit of the using the best available science, and benefits to natural systems should not stand in the way of helping families lift themselves from poverty when in fact we can successfully pursue both of these goals with modest investments in workforce development leveraging large scale investments in restoration.

3) Establish practices to increase inclusion of the most vulnerable in project development and assessment

It is important that the communities who most depend on the health of the Gulf of Mexico have input into the planning and implementation of this Plan, and see their needs reflected in it and its decision-making process. In particular, the Council should affirm its support for engagement with communities and stakeholders who are often not represented in decision-making processes but who are often disproportionately impacted by such decisions. In the past organizations representing low income and minority communities have suggested advisory committees or other types of formal representation in decision-making, which despite widespread support and historic examples, the Council has continued to resist. At a minimum, the Council's public engagement team should devote resources to a programmatic effort to build the capacity of nonprofits and civil society groups representing vulnerable communities to engage the Council, its member agencies and the project development and assessment process. Beginning such a commitment by detailing a more thoughtful and detailed approach to inclusion within its Comprehensive Plan would mark an important first step.

THE TRUST FOR PUBLIC LAND

## Comments regarding the Gulf Coast Ecosystem Restoration Council's Draft Comprehensive Plan Update for 2016

October 7, 2016

The Trust for Public Land, a 501(c)(3) nonprofit land conservation organization, appreciates the opportunity to offer its views on the RESTORE Council's Draft Comprehensive Plan Update. We commend the Council for the sound vision and refined priorities outlined in the draft update, which we believe will serve as a solid basis for critical investments and partnerships across the Gulf region. In that context, The Trust for Public Land is pleased to share our perspective on several elements of the draft update and recommend clarifications we believe the Council should consider to make the best use of available resources.

For over 40 years, The Trust for Public Land has advanced its mission to conserve "land for people." The organization has completed more than 5,200 conservation projects and protected more than three million acres nationwide, including more than 200,000 acres in the five Gulf Coast states.

The Trust for Public Land has a longstanding presence in the Gulf Coast protecting coastal resources. Since opening its first Gulf States office in Florida in 1975, The Trust for Public Land has completed 250 projects - 70,000 acres - in coastal counties from the Florida Keys to Corpus Christi. We have partnered with four states, 19 counties, and 30 cities to create parks, set aside coastal buffers, and protect key watersheds. This work has covered an immense range of habitat types, from coastal islands, beaches, and coastal wetlands to bottomland hardwoods, longleaf pine, swamps, and riparian corridors.

Like other public and private entities across the Gulf, The Trust for Public Land was profoundly moved by the damage wrought by the Deepwater Horizon spill more than six years ago. Indeed, among the heavily oiled areas were sites The Trust for Public Land had worked to conserve. The Trust for Public Land shares the resolve of the Gulf Coast community that the region must be restored to equal or better condition than prior to the spill.

We are eager to continue advancing our "land for people" mission for the benefit of the communities affected by the oil spill. This includes remaining an engaged conservation partner

of the RESTORE Council and the people of the Gulf Coast. To that end, we offer our views of the draft Comprehensive Plan Update. Each comment is arranged in the order in which the corresponding topic appears in the draft Comprehensive Plan Update.

\*\*\*\*\*

Land acquisition should be a core strategy to advance each of the Council's five goals:

"To provide the overarching framework for an integrated and coordinated approach for region-wide Gulf Coast restoration and to help guide the collective actions at the local, state, Tribal and federal levels, the Council established the following five goals in the Initial Plan: Goal 1: Restore and Conserve Habitat; Goal 2: Restore Water Quality and Quantity; Goal 3: Replenish and Protect Living Coastal and Marine Resources; Goal 4: Enhance Community Resilience; and Goal 5: Restore and Revitalize the Gulf Economy"(pg. 6)

The Trust for Public Land encourages the Council to regard acquisition of property interests - either fee or less than fee - as a core strategy that helps address longevity of benefits in implementing each of the five goals. We were encouraged to see the Council select several projects involving land acquisition as part of the Initial Funded Priorities List (FPL). Implementation of or planning for land acquisition was a major component of FPL projects in Laguna Madre, Matagorda Bay, Galveston Bay, and the Mississippi Sound as well as a Gulf-wide strategic land conservation planning efforts sponsored by the Departments of Agriculture and Interior. These FPL projects - which are budgeted for more than \$40 million - are an excellent beginning, and we recommend that the Council continue to give full consideration to land acquisition projects as a tool to meet its five goals.

Permanent land conservation as a restoration tool can be an integral component of each RESTORE goal: Protecting land through fee acquisitions as well as acquisition of less-than-fee interests - working with private landowners - also allows resource managers to provide long-term stewardship and management. In addition, protected areas offer multiple water quality benefits, which in turn contribute to habitat health for living resources. Open, protected spaces are recognized as an important feature in overall coastal community resilience from storm hazards and flooding, and communities with significant protected natural areas and greenspaces

realize benefits such as stable property values, quality of life and areas to recreate and gather.

The Council should adopt land acquisition as a core strategy to meet each of the Comprehensive Plan's five goals.

\*\*\*\*\*

Comprehensive Plan Update will include "water quantity" as a factor under Council Goal 2:

"The Council proposes to include 'water quantity' in the existing Goal 2 on water quality. Restoring water quality and habitat can at times require efforts to address water quantity issues. For example, restoring freshwater inflows to bays and estuaries is essential for restoring coastal waters and habitats by re-establishing natural salinity levels and sediment regimes." (pg. 6)

The Trust for Public Land supports the addition of water quantity under Council Goal 2. In a changing climate with the heightened risks of rising sea levels and stronger and more frequent storms, the preservation of freshwater in the Gulf's coastal areas is a paramount concern. As we saw with Hurricanes Katrina and Rita, saltwater intrusion in freshwater marshes can stress vegetation and wildlife not adapted to increased salinity levels. Any effort to restore the long-term ecological health of the region must address these risks as a first order priority. And it should be noted that water quality and water quantity issues are often inextricably linked together in many natural systems in the Gulf - specifically delineating both areas is important for future work.

The final Comprehensive Plan Update should adopt the draft's proposal to add "water quantity" under Council Goal 2 relating to water quality.

\*\*\*\*\*

Comprehensive Plan Update will give "people desirable places to live, work and play":

"To achieve all five goals, the Council supports ecosystem restoration that can enhance local communities by giving people desirable places to live, work, and play, while creating opportunities for new and existing businesses of all sizes, especially those dependent on natural resources." (pg. 7)

The Trust for Public Land applauds the Council's aim to apply its goals in a manner that will benefit human communities. The Council's consideration of proposals that benefit Gulf residents is consonant with The Trust for Public Land's "land for people" mission. Throughout our organization's history, connecting people with the outdoors has been our guiding light.

As the Council is aware, a wide variety of businesses are "dependent on natural resources." They encompass a range of sectors not limited to extraction industries. Indeed, at \$646 billion in annual consumer spending and more than six million jobs, the outdoor recreation industry - which includes services tied to activities such as biking, hiking, fishing and hunting - is among the nation's leading economic sectors. According to Outdoor Industry Association research, annual consumer spending on outdoor recreation in the five Gulf States totals nearly \$95 billion and employs almost 900,000 residents. Furthermore, apart from active outdoor recreation, more leisurely tourism is a large draw to the region. For example, nearly ninety percent of Florida's domestic visitors primarily travel the Sunshine State for leisure purposes. Moreover, last year, New Orleans hotels booked 4.8 million rooms to leisure visitors - 200,000 more than the prior year and several hundred thousand more than 2010.

Restoring and enhancing public access to the Gulf's abundant natural treasures - from beaches to bayous and parks to forests - to accommodate both active and leisurely outdoor activities is pivotal to the success of these essential components of the region's economy. The Council's support for ecosystem enhancement and resource conservation projects that protect and increase public access to the region's natural treasures will promote more such business opportunities by stimulating outdoor tourism while providing places for Gulf Coast residents to recreate and connect with nature.

We believe that there will be a plethora of opportunities to carry out land and water conservation and restoration work in the Gulf that in addition to ecosystem benefits will also provide new recreation opportunities for Gulf Coast residents and visitors, boost the tourism economy and create jobs, and/or benefit local natural resource based businesses such as those that are fishery related. We applaud the Council's desire to support projects that benefit local communities in

addition to restoring and conserving coastal habitats and support the Council developing over time a portfolio of projects that conserve the environment for important goals like habitat protection and water quality while also supporting local communities and the people that live there.

The final Comprehensive Plan Update should maintain a view to benefiting the quality of life of Gulf residents "by giving people desirable places to live, work, and play."

\*\*\*\*\*

The Council's project selection process should be neutral to cost- and acreage-size:

"Large-scale projects and programs that are projected to substantially contribute to restoring and protecting the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches, and coastal wetlands of the Gulf Coast ecosystem." (pg. 17)

The legislation authorizing the RESTORE Council's work includes a prioritization process emphasizing projects that provide "the greatest benefit for the ecosystems of the Gulf Coast." Even in light of the record-breaking size of the BP settlement, there is an enormous need across the region to protect sensitive wetlands and wildlife habitat harmed by the spill while bolstering outstanding recreational and outdoors tourism opportunities that support the economies and quality of life of coastal cities and towns. It is crucial that the Council's investments are thoughtfully scaled to meet those communities' needs. In some circumstances, smaller acreage projects will be most cost-efficient and expeditious in delivering "the greatest benefit[s]" to Gulf communities - particularly in cases where those smaller projects can meet major community needs, and/or where they represent important missing puzzle pieces with synergistic benefits to larger conservation systems. For example, local park projects needed to provide public access and recreational opportunities can also provide the critical linkages that achieve larger ecological goals, such as securing nesting sites for sea turtles and stopover areas for migratory bird species.

The Trust for Public Land has worked with the Florida Fish and Wildlife Commission, for example, to successfully apply settlement funds (via MOEX Offshore and NRDA) to the

conservation of strategic parcels in the state's panhandle region. While not particularly massive in terms of acreage, these projects are already having an immensely positive impact on their communities in terms of public access to recreation, and groundwater and wildlife habitat protection. Moreover, they contribute to a broader vision of a network of coastal parks and public lands that will protect near-shore water quality by preserving inland watersheds. These types of projects demonstrate that large-scale benefits do not exclusively flow from massive proposals.

Although the RESTORE Act directs the Council to prioritize "large-scale projects and programs," we urge the Council to refrain from applying an arbitrary litmus test that assesses project proposals strictly on their cost or acreage-size, but also recognize that scale can be evaluated in terms of benefit to the impacted resource. Its prioritization method should be neutral in relation to those factors and should be based on the relative benefits of dollars invested to restoration and conservation results achieved. Projects of all sizes can make extraordinary gains in achieving a particular resource conservation goal but also significant impact to individual communities' priorities and goals. Indeed, projects of modest cost and acreage may, at times, be best suited to meet resource conservation needs while simultaneously offering the greatest and most cost-effective benefits to affected communities.

Council projects should be assessed based on the expected benefit to targeted resources and communities' resilience and local economies without arbitrarily favoring those with large footprints or price tags.

\*\*\*\*\*

Again, The Trust for Public Land is grateful for the opportunity to offer its views of the draft Comprehensive Plan Update, and the organization stands ready to work with the Council to ensure that the recovery effort is the success it must be for the people of the Gulf.

Sincerely,

Raymond Christman  
Senior Vice President and  
Gulf Coast Program Director

7 October 2016

The Honorable Thomas J. Vilsack  
Chair, Gulf Coast Ecosystem Restoration Council  
Hale Boggs Federal Building  
500 Poydras Street, Suite 1117  
New Orleans, LA 70130

Re: Comments on Draft Comprehensive Plan Update 2016

Dear Secretary Vilsack:

The Gulf Coast Ecosystem Restoration Council (Council) recently published a notice of availability of its Draft Comprehensive Plan Update 2016 (Plan Update) to implement Council-funded restoration activities under the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States (RESTORE) Act of 2012 (81 Fed. Reg. 57582). The revisions in the Plan Update reflect comments received and lessons learned since the issuance of the Council's initial Comprehensive Plan and draft Funded Priorities List.

The Marine Mammal Commission (Commission) supports the Plan Update and its emphasis on improving Council decision-making through enhanced Council member coordination, stronger collaborations with other funding sources, improved application of the best available science, more robust measures of success, and greater public engagement and transparency. The Commission also supports the Council's new vision statement emphasizing collaborations on strategic restoration projects and programs as a means to achieving a healthy and productive

Gulf ecosystem.

The Plan Update clarified one of its goals to include the restoration of water quantity as well as water quality. Although the Plan Update does not provide specific details regarding the impetus for this clarification, it is the Commission's understanding that this is meant to address projects that may affect changes in water flow, such as river diversions and other actions designed to restore the natural hydrology of marshes and wetlands. Those types of projects could lead to short- and long-term changes in the salinity of nearshore waters. Exposure of dolphins to freshwater conditions (salinity <10 ppt) over an extended period of time can compromise epidermal integrity (as evidenced by skin lesions), alter blood chemistry, cause physiological stress, and contribute to secondary infections leading in some cases to death (Wilson et al. 1999; Colbert et al. 1999; Reif et al. 2006; Holyoake et al. 2010; Rowe et al. 2010; Mullin et al. 2015). Low-salinity conditions can also affect the distribution of dolphin prey (Barros and Odell 1990). Besides affecting salinity levels, projects designed to restore marshes and wetlands could have deleterious effects on marine mammals, as summarized in previous letters<sup>1</sup>. Formal consultation with both the National Marine Fisheries Service (NMFS) and the U.S. Fish and Wildlife Service (FWS) must therefore be conducted to identify appropriate mitigation measures associated with such projects, in compliance with the incidental take provisions of the Marine Mammal Protection Act and Endangered Species Act.

Therefore, the Commission reiterates its previous recommendation that the Council consult with NMFS regarding the potential for incidental taking of bottlenose dolphins and with FWS regarding potential effects on manatees (and other endangered species under FWS's jurisdiction) and designated critical habitat associated with inshore and nearshore restoration activities that may be funded or directed by the Council.

It is anticipated that consultation could result in requirements to monitor the effectiveness of project-related mitigation and also potential effects on marine mammals and other species. Such monitoring would be useful to inform future decision-making as part of an adaptive management approach to Gulf restoration. Consistent with the Council's stated emphasis on applying the best available scientific information, it is imperative that monitoring programs associated with any large-scale restoration project be developed in close coordination with other state, federal, and private programs involved in funding or directing Gulf restoration projects (National Academies of Sciences, Engineering, and Medicine 2016). The Commission commends the Council's recognition of the need for greater coordination and collaboration

between Council members and with other funding sources. Coordination and collaboration efforts should include those agencies with expertise in monitoring marine mammal populations, especially those populations that were injured as a result of the Deepwater Horizon oil spill and for which recovery is a high priority. The Commission recommends that monitoring the potential effects of large-scale restoration activities be conducted in close collaboration with NMFS and FWS.

I hope these comments and recommendations are helpful to the Council. Please let me know if you have any questions.

Sincerely,

Rebecca J. Lent, Ph.D.  
Executive Director

RESTORE Council

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

\* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the

best results.

\* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

Please help all of the wildlife that suffered after the disaster in the Gulf.

#### **Correspondence Text**

Dear Council Members,

Tierra Resources is a small business based in Louisiana, and like many small businesses, we are very concerned about the threat coastal land loss poses to the culture, ecosystem and economy of the region. The mission of Tierra Resources is to conserve, protect, and restore coastal wetland ecosystems by creating innovative solutions that support investment into wetlands. Carbon finance creates opportunities for companies to invest in wetland restoration projects to offset their greenhouse gas emissions, and could provide an additional revenue stream for coastal restoration. We also partner with landowners to implement programs to restore wetlands.

The opportunity presented by the BP Deepwater Horizon settlement is unique in providing significant new funding for coastal restoration, guaranteed over 15 years. Yet the scale of the problem and the cost of the solution are immense, and it will not be enough to meet all restoration needs. We are very concerned that the dollars available for restoration be carefully calibrated to create a meaningful lasting impact in the Gulf. In reviewing the Council's draft update to its Comprehensive Plan, we are pleased to see and agree with plan's reiteration of its commitments to using the best available science and leveraging projects, both in terms of dollars and restoration benefits

To get the most bang for the buck, projects prioritized for funding must be those that provide maximum benefits, in coordination with other projects being developed under other funding streams. We support the Council's expanded plans for interagency coordination, although we urge you to move forward with specific timetables and concrete steps for the agencies involved to ensure that no funding is siphoned and relevant permitting issues can be addressed.

As the modeling and science shows, landscape-level restoration projects like diversions need to be a central part of successful long-term restoration, so we commend the Council for recognizing their importance in the draft Plan. Diversions rebuild land most economically over the long haul and also serve to buttress the long-term success and resilience of other individual restoration and protection projects. The Plan's recommitment to landscape-level plans is equally important.

Also, as you revise your project submission guidelines for future Funded Priority Lists (FPLs), it would be helpful to provide very specific guidance to applicants about how they need to demonstrate compliance with RESTORE Act criteria. This can save time, help lead to higher quality proposals and reduce the need for resubmissions because of incomplete initial information. Future FPLs would also benefit by considering the optimal timing and staging of

RESTORE projects vis a vis projects under other funding streams.

Thank you for this opportunity for comment, and for your continuing work to advance urgently needed coastal restoration.

Dr. Sarah K. Mack, President & CEO  
Tierra Resources LLC

Gulf Coast Ecosystem Restoration Council  
500 Poydras Street  
Suite 1117  
New Orleans, LA 70130

RE: Partnership for Gulf Coast Land Conservation Comments on the Updated Comprehensive Plan

Dear Council Members:

Thank you for the opportunity to comment on the Gulf Coast Ecosystem Restoration Council's (Council) Updated Comprehensive Plan (Updated Plan). These comments are being submitted on behalf of the Partnership for Gulf Coast Land Conservation (Gulf Partnership), a broad

coalition of non-profit land conservation organizations operating in the Gulf of Mexico region. Our mission is to work together across the Gulf of Mexico coastal region and within watersheds bordering the Gulf of Mexico to increase the pace, quality, and permanence of voluntary land and water conservation.

We appreciate the hard work of the Council members and staff and are pleased to see that the Updated Plan incorporates many of the changes that were recommended by conservation organizations and other stakeholder groups.

## Plan Goals

The Gulf Partnership has previously stated that we applaud the five goals that were outlined in the initial plan and remain unchanged in this document:

Goal 1: Restore and Conserve Habitat. Restore and conserve the health, diversity, and resilience of key coastal, estuarine, and marine habitats;

Goal 2: Restore Water Quality and Quantity. Restore and protect the water quality and quantity of the Gulf Coast region's fresh, estuarine, and marine waters;

Goal 3: Replenish and Protect Living Coastal and Marine Resources. Restore and protect healthy, diverse, and sustainable living coastal and marine resources;

Goal 4: Enhance Community Resilience. Build upon and sustain communities with capacity to adapt to short- and long-term changes; and

Goal 5: Restore and Revitalize the Gulf Economy. Enhance the sustainability and resiliency of the Gulf economy.

Permanent land conservation as a restoration tool can be an integral component of each RESTORE goal. Protecting land through easements and fee acquisition is an effective, efficient strategy in restoring and conserving coastal habitats; also, protected areas offer multiple water quality benefits, which in turn contribute to habitat health for living resources. Protected open spaces improve coastal community resilience by providing protection from storm hazards such as flooding. Furthermore, communities with significant protected natural areas and greenspaces

realize benefits such as stable property values, improved quality of life and increased opportunities for recreation and tourism.

### Updated Plan Improvements

We strongly support the following three elements that have been added:

- 1) The updated Plan includes a role for the Council to serve as the connector between Deepwater Horizon-related funding sources, and describes a series of meetings and workshops to foster coordination and collaboration between the Council and its restoration partners in the Natural Resources Damages Assessment (NRDA) process and the National Fish and Wildlife Foundation (NFWF) Gulf Environmental Benefit Fund (GEBF). The Plan also highlights the importance of working with other stakeholders (e.g., local governments, business leaders, nonprofit organizations and others).
- 2) The Plan includes improvements to the proposal development and submission process. Council members and reviewers will evaluate each proposal as described here: (1) how a proposal meets basic eligibility criteria; (2) how the proposal utilizes best available science, engineering, and processes; and (3) the likelihood that a proposal will lead to measurable and lasting ecosystem benefits, including, for example, a determination of whether a project restores critical natural processes and/or enhances ecosystem function.
- 3) The Council is explicitly inviting large scale projects designed to restore and maintain ecosystem function.

### Considerations for further improvement

Gulf Partnership member organizations have been leaders in ecosystem restoration in the Gulf of Mexico region for many years. The land conservation community has experience in: 1) the development of science-based, strategic conservation plans; 2) project development; 3) negotiation and implementation of land transactions; 4) long-term stewardship; 5) community education; 6) working with private landowners and public agencies; and 7) providing public access to open spaces and natural places.

Based upon our collective experience, we offer these suggestions for further improving the Comprehensive Plan and the work of the Council:

- 1) Consider funding the development of landscape scale land conservation projects. There are significant upfront financial costs and labor burdens associated with large easement and acquisition projects, including due diligence such as ecological/biological surveys, land surveys, title work, and appraisals;
- 2) Collaborate with the NRDA Trustees, the GEBF and the Gulf states to align project selection guidelines and funding cycles so that multiple resources can be leveraged on land conservation projects. All three funding programs include land conservation as a potential restoration strategy, but at present it is very difficult to plan and propose land conservation projects that could be leveraged by multiple sources due to differences funding cycles and program requirements. We believe closer alignment of the cycles will allow more and better opportunities to leverage funds, and to complete projects in a timely way which is critical when working with willing sellers.
- 3) Include funds for ecological restoration, long-term stewardship and monitoring in land conservation projects.
- 4) Recognize the urgency in land conservation. Land conservation practitioners understand that ecosystem restoration is complex and that planning takes time. However, sometimes critical habitat that should be protected is only available for purchase or easements from willing sellers for a short time. Many landowners are not able or willing to wait for several more years. The Gulf Partnership requests that the Council consider making some funding available every year for land conservation.

Thank you again for the opportunity to participate in this process. The members of the Gulf Partnership look forward to working with members of the RESTORE Council and other restoration partners to restore the Gulf Coast ecosystem, strengthen community resilience and improve the economy.

Sincerely,

Ray Herndon

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Mississippi River Delta and Gulf Coast. Louisiana's coast is home to more than two million people, countless wildlife and birds, and vital industries and infrastructure.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I look forward to learning more about how the Council will apply this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the plan, I encourage you to:

- Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected.
- Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Mississippi River Delta and Gulf Coast.

These comments are made to re-affirm my concerns with the exclusionary process which resulted in the Initial Comprehensive Plan accepted, in August 2013. Those same concerns exist to date, the goals and objectives in this comprehensive plan update remain vague and lack explicit details on process and procedures.

Therefore, extensive assessment(s) should be conducted, provided for public review, discussion and input before this plan is accepted for implementation.

Council's goals, and objectives are vague and lack explicit details on process and procedures.

Therefore, extensive assessment(s) should be conducted, provided for public review, discussion and input before this plan is accepted for implementation.

#### Recommendations

1. Any Initial Ten-Year Funding Strategy must include collaboration, community engagement and public input in the decision making process of the Council.
2. Council's vision for Gulf restoration reflect prioritization of leveraging funding, I strongly recommend that higher priority be given to historically underserved coastal impacted community planning and project development.
3. Increasing collaboration, community engagement and public input in the decision making process of the Council members and partner restoration programs;

This comprehensive plan update is vague and lack explicit details on process and procedures. Therefore, extensive assessment(s) should be conducted, provided for public review, discussion and input before this plan is accepted for implementation.

A request for an extension to the comment period was requested, thus these comments are broad and reflects the vagueness of the initial and proposed update comprehensive plan. Therefore, extensive assessment(s) should be conducted, with coordinated community/public engagement activities which set forth public review, discussion and input before this plan is accepted for implementation.

As stated in past and the most current listening session (mandatory public meeting) there exist a continuous lack of public engagement which has created an exclusionary process.

Community Engagement, Public Input concerns: The public and impacted communities and organizations (impacted stakeholders) have not been provided opportunities for meaningful engagement and input. Listening sessions, does not in any form, process and/or procedure provide opportunity for meaningful public engagement and input for actual decision making.

Initial Funded Priorities List: The goals and objectives of the initial and this updated plan remain vague and lack explicit details on process and procedures.

Decision Making Process for Selected Components: Priority Criteria needs to be updated to include accountability, with the establishment of quantifiable measure(s) and a total elimination of check the box process.

Planning and Implementation Phases, has not provided opportunities for meaningful engagement and public input for the decision making process.

Robust community engagement, public input, transparency and accountability processes that fully inform the public, and seeks meaningful input should be immediately implemented.

Engaging frontline communities in the design and implementation of restoration strategies is critical and should be included in the comprehensive plan before it is accepted/approved.

#### Comments and Recommendations

Reinforcing the Council's goals, and objectives; the goals and objectives in this comprehensive plan update remain vague and lack explicit details on process and procedures. Updated plan requires clarity.

Initial Ten-Year Funding Strategy; Priority should be given to provide equity for directly impacted coastal communities; with the leveraging of funding and scale becoming secondary.

Council's vision for Gulf restoration need to be defined, scope clarified, uniform and concise with quantifiable measures.

Increasing collaboration among Council members utilizing a robust community engagement , public input, transparency and accountability processes that fully inform the public, and seeks meaningful input should be immediately implemented.

Improving the efficiency, effectiveness and transparency of Council actions. Revise submission guidelines for future FPLs is overwhelmingly supported, with meaningful engagement activities which provide the public opportunities to provide formal input on submission guidelines, proposal development, and selection criteria(s).

October 6, 2016

Gulf Coast Ecosystem Restoration Council (RESTORE Council)

Hale Boggs Federal Building

500 Poydras Street

Suite 1117

New Orleans, LA 70130

RE: Draft Comprehensive Plan Update 2016

Dear RESTORE Council:

On behalf of the Mississippi Coalition for Vietnamese-American Fisher Folks & Families (MSCVAFF) and our constituency, we submit the following comments, concerns, and recommendations for the public record:

#### Public Comment Deadline

MSCVAFF requested an extended two week public deadline beyond the initial forty-five days to address language access needs for Vietnamese-American fisher folks during fall 2016 shrimping season. Further, there was multiple RESTORE Council public meetings scheduled the same week as a Natural Resource Damage Assessment (NRDA) public meeting. Multiple coastal restoration public meetings (RESTORE, NRDA, State Trustees) closely scheduled hinders the ability of the public to meaningfully participate and provide input within a short time frame.

To reiterate, please allow additional time between the posting of a draft document on the Federal Register, hosting public meetings, and the public comment deadline. Forty five days is insufficient time to review all relevant documents and materials (both in English & Vietnamese), attend closely scheduled coastal restoration public meetings (RESTORE, NRDA, State Trustees) and disseminate relevant information to our constituency, particularly during the shrimping season.

MSCVAFF highly recommend greater communication and increased coordination amongst the various Trustees Councils, particularly when the same federal & State agencies serve on multiple Councils (serve on RESTORE Council, NRDA Trustees Council & Trustees Implementation Groups {TIGs}).

#### Public Participation & Transparency

As an engaged organization, MSCVAFF observed that many public meetings are held in

locations/venues that are not very accessible nor convenient for community residents from underserved, disproportionately impacted communities. By and large, attendees and commenters at public meetings are representatives of larger environmental, conservation organizations/groups, staff/representatives from State and federal agencies, academic institutions. A limited number of community residents from underserved, disproportionately impacted communities have opportunities to attend the public meetings.

Various community-based organizations such as MSCVAFF can provide input on engaging underserved, minority populations with language access needs, targeted outreach, and hosting meetings in more accessible meetings locations.

In addition, there was a lack of printed copies of the Draft Comprehensive Plan Update for the public to review. One page fact sheets (both English & translated Vietnamese copies) were available; however, the short fact sheets lack sufficient information referenced in the Draft Comprehensive Plan Update. At future meetings, it would be very helpful if printed copies of all relevant documents was available for review.

Further, MSCVAFF recommend the Council provide additional time for public commenting beyond the standard three minutes.

### Best Available Science

Create an independent review panel, consisting of natural scientists, social science researchers and community representatives (for example, fisher folks) and/or their designees to review projects

Uniform monitoring and restoration performance metrics

Accessible and transparent monitoring data

Thorough analysis of projects (include risks, uncertainties & potential negative trade-offs). For example, restoration projects to create marshes cause a loss of natural contours and affects the ability of fisheries to spawn.

Best practices & lessons learned

Adaptive management processes/ contingency plans for projects

Thorough evaluation of projects (success, failure, lessons learned)

## Gulf Coast Ecosystem Restoration Task Force Restoration Strategy & Public Engagement

On page 6, the Draft Comprehensive Plan Update states, in developing the Initial Plan, the Council built on the strong foundation established in the Gulf Coast Ecosystem Restoration Task Force Strategy, and other local, regional, state and federal plans. Consistent with the RESTORE Act, the Councils Initial Plan adopted and expanded upon goals set forth in the Task Force Strategy. The Council believes these goals continue to represent the proper science based approach &

Further, the Task Force Strategy also list public engagement and input as an important component. In May 2011, based on public input received, the EPA announced plans to establish a new federal advisory committee, a 25-member Gulf of Mexico Citizen Advisory Committee, which will become an additional vehicle for citizen engagement and support as the Strategy recommendations are implemented. One of the most important actions needed subsequent to the Deepwater Horizon disaster is the establishment of a legitimate, representative, and funded Regional Citizens Advisory Council (RCAC) to engage Gulf coast residents in offshore oil and shipping safety, modeled on those established in Alaska after the 1989 Exxon Valdez Oil Spill ([www.pwsrcac.org](http://www.pwsrcac.org); [www.circac.org](http://www.circac.org)). Many feel that a well-funded, representative Gulf of Mexico RCAC would be the single most (<http://www.onwingsofcare.org/gomrcac/GoMRCAC-ProposedLegislation2013-07-29.pdf>) important action needed to reduce the risk of another offshore oil spill disaster in the Gulf, however, almost six years later, the RCAC has yet to be established. To reiterate, this was recommended by many Gulf Coast residents in the aftermath of the Deepwater Horizon/BP Oil spill, and was endorsed in 2011 by the National Commission on the BP Deepwater Horizon Oil Spill and Offshore Drilling.

We respectfully propose that the GoMRCAC be established and funded by the \$1.1 billion portion of the Clean Water Act civil penalty that is paid into the federal Oil Spill Liability Trust

Fund. We request to allocate 20% of that CWA amount - or \$225 million - into a dedicated endowment/trust account at the National Pollution Funds Center, from which the interest earnings will fund the annual budget of the GoMRCAC (approximately \$10 million/year).

## Conclusion

We urge the Council to implement our recommendations to address serious livelihood sustainability concerns in fishing communities and look forward to continue engagement with the Council.

Sincerely,

Thao Vu, Director

Mississippi Coalition for Vietnamese-American Fisher Folks & Families (MSCVAFF)

1636 Popps Ferry Rd., St. 223

Biloxi, MS 39532

Please use some of the money from the 2012 Restore Act to replace 4 sections of the Mobile Bay Causeway with 3 short bridges. This will allow 5 Rivers that flow to the bay to actually be able to flow, helping the local habitat by reducing overgrowth of weeds and silt buildup and deepening the boat channels thereby improving the local fishing industry. The Mobile Bay Causeway was not build with the environment in mind and we need to correct some of the damage that it has caused over the last 89 years. Our streams are filling with silt and drying up. Boats are running a ground and we spend too much money dredging our ship channels because of this problem. We already dredged enough to build Gaillard Island and are now trying to find somewhere else to dump the sediment that fills the channels. Please fix it!!!

Replenishment of the beaches by continual restoring the lost sand is an infinitesimal endless senseless project because the replaced sand will perpetually get washed away. Installing stone breakers to reduce storm wave action is the most logical solution in preventing shore erosion over the long term.

## **Appendix A.**

Dear Restoration Council,

I care about the future of the Gulf Coast and want to make sure that we use this once-in-a-lifetime opportunity to its fullest potential. I am an advocate for the birds of the Gulf Coast that were so severely impacted by the BP oil spill, and I want to make sure their needs are prioritized in future restoration efforts. The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of this important ecosystem for birds and humans alike.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also appreciate the Council's commitment to maximize the benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast. The people and birds that depend on a healthy Gulf Coast deserve nothing less.

## **Appendix B.**

Dear Attention: Draft Comprehensive Plan,

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf Coast. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration, and I look forward to learning more about how the Council will carry out this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

1. Commit to the formation of a review panel that looks across all proposals to assess project interactions and maximize benefits of projects.
2. Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

## Appendix C

Dear Council,

I care about the future of the Gulf Coast, and want to make sure that we use this once in a lifetime opportunity to its fullest potential. I am pleased that the RESTORE Council's draft updated Comprehensive Plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I also applaud the Council's intention to maximize the benefits of projects, both through improved proposal submission guidelines and more robust science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the Plan, I encourage you to:

- \* Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, so that we achieve the best results.
- \* Ensure that the coordination workshops and meetings in 2016/2017 are transparent, inclusive, and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf Coast.

## Appendix D

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Mississippi River Delta and Gulf Coast. Louisiana's coast is home to more than two million people, countless wildlife and birds, and vital industries and infrastructure.

I am pleased that the RESTORE Council's draft updated plan expresses a commitment to advancing large-scale projects, which are critical for achieving ecosystem-scale restoration. I look forward to learning more about how the Council will apply this commitment.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the plan, I encourage you to:

- Commit to the suggested formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected.
- Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiencies and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Mississippi River Delta and Gulf Coast.

## Appendix E

Ocean Conservancy submits the letter below on behalf of 13,760 of our supporters. Thank you for the opportunity to submit these comments on behalf of our constituents.

Dear members of the Gulf Coast Ecosystem Restoration Council:

The release of this draft Comprehensive Plan Update represents an important step toward meaningful, science-based restoration of the Gulf of Mexico. I am pleased that the RESTORE Council's draft updated plan expresses a commitment to regionwide planning, which is critical for achieving ecosystem-scale restoration.

I also applaud the Council's commitment to maximize the positive benefits of projects, both through improved proposal submission guidelines and science-based review, and through thoughtful coordination across agencies and restoration programs.

To further strengthen the plan, I encourage you to:

- - Commit to the formation of a science review panel that looks across all proposals to assess project interactions and maximize benefits of projects selected, and
- - Ensure that the coordination workshops and meetings in 2016/2017 are transparent and result in concrete next steps for improving efficiency and coordination in Gulf restoration efforts.

Thank you for your efforts to update the Comprehensive Plan and create a strong legacy for the Gulf of Mexico region.

Signed,
